

Software Developer Software Developer Software Developer Massapequa Park, NY I am looking for an opportunity to use the technical and team skills I have gained from school and my career path in order to help the company achieve goals, while also improving these skills through my work.

Work Experience

Software Developer IBM - Poughkeepsie, NY July 2015 to May 2018

Function tested new code being developed from different parts of our department, while maintaining over one thousand different testcases spanning over multiple different functionalities for our team ? Individually debugged issues found in our regression buckets in order to discover possible defects in our code before being found in the field, as well as added new testcases to further improve our regression ? Involved in DevOps for my team and was involved in transformation into Agile practices ? Helped to bring new functionality to the team and introduce new tools as well as improvements for our existing tools ? Involved in code reviews, design discussions, and iteration discussion for my team in order to prioritize work for completion ? This helped to improve our team efficiency and help relieve blockers which were holding up development more rapidly than with previous methods ? Responded to customer requests and prioritized work that would result from these requests as a team

Was involved in testing for z/OS release 2.2 and 2.3, both of which were two year multi-divisional projects for the software teams

Took courses early on to improve skills in programming languages used at IBM and testing methodology

Front- End Developer Marist College Archives - Poughkeepsie, NY September 2014 to May 2015

Created and maintained webpages for the Marist College Library using PHP, HTML, CSS and Javascript

Handled forms and databases using SQLite

Made updates required for improvement of the website and kept information up to date for the Marist College Library's website
