

Sr. Python Developer Sr. Python Developer Sr. Python Developer - Microsoft Redmond, WA Over 7+ years of experience in IT Industry with proficiency in Design & Development of Python, Java/J2EE, Django, flask projects Experience in Multi-Tier distributed Enterprise applications Extensive experience in system analysis, design, development and implementation of web based and client/server application using HTML, Angular JS, BootStrap, underscore JS, Node JS, CSS, JavaScript, AJAX, JSP, JDBC, XML, XSLT, Python, Django, PHP Working knowledge in multi-tiered distributed environment, OOAD concepts, good understanding of Software Development Lifecycle (SDLC) Developed Java/J2ee applications using Hibernate, XML, Android, XSLT, and Basic ASP.net applications including using Core Java concepts like OOPS, Multithreading, Garbage Collections, and Collection etc. Experience in Implementation of MVC/ MVW architecture using Servlet, Django, and RESTful, SOAP web service and SOAPUI Experienced in installing, configuring, modifying, testing and deploying applications with Apache, Tomcat and WebSphere. Extensively followed development methodologies such as Agile (SCRUM), Water Fall Excellent Experience of Databases such as MySQL, Oracle 8g/9g/10g, Microsoft SQL Server, PostgreSQL, SQL/PLSQL concepts Good Knowledge of using IDE Tools like Eclipse, NetBeans, Android Studio, Visual Studio, IDLE. Experience on Ruby Reg-Ex for pattern and Text matching. Good command on full life cycle application development. Designed and developed video and blogging website on PHP using WordPress on wamp server using MySQL database Experience with continuous integration and automation using Jenkins Developed ColdFusion Components, custom tags and modified CF Objects Experience with Unit testing/ Test driven Development (TDD), Load Testing in JIRA, JENKIN. Wrote AJAX framework to transform Datasets and Data tables into HTTP-serializable JSON strings Authorized to work in the US for any employer Work Experience Sr. Python Developer Microsoft - Redmond, WA December 2016 to Present Responsibilities: Made Django web based apps for Insurance premium calculations. Gathered all requirement for developing and analysing requirement of projects in giving time. Developed entire frontend and backend modules using Python on Django including Tastypie Web Framework using Git. Developed Merge jobs in Python to extract and load data into MySQL database. Successfully

migrated the Django database from SQLite to MySQL to PostgreSQL with complete data integrity
Used Test driven approach for developing the application and Implemented the unit tests using
Python Unit test framework. Dynamic implementation of SQL server work on website using SQL
developer tool Designed front end using UI, HTML, Bootstrap, Node JS, underscore JS, Angular
JS CSS, and JavaScript. Involved in the Complete Software development life cycle (SDLC) to
develop the application. Followed AGILE development methodology to develop the application.
Used and customised apache server to for checking our developed project. Used Test driven
approach (TDD) for developing services required for the application. Implemented Integration test
cases Used Git to resolve and coding the work on python and portlet Environment: Python 2.7,
PyQT, PyQuery, MVW, HTML5, CSS3, DOM, Angular.js, Shell Scripting, JSON, Rest, Apache Web
Server, Django, SQL, UNIX, Windows, PostgreSQL, and python libraries such as Numpy,
sqlalchemy, Django Tastypie Python Developer T-Mobile - Bellevue, WA March 2015 to October
2016 As America's Un-carrier, T-Mobile US, Inc. (NYSE: "TMUS") is redefining the way consumers
and businesses buy wireless services through leading product and service innovation. The
company's advanced nationwide 4G and 4G LTE network delivers outstanding wireless experiences
for customers who are unwilling to compromise on quality and value. Based in Bellevue, WA
T-Mobile US operates its flagship brands, T-Mobile and MetroPCS. It currently serves approximately
43 million wireless subscribers and provides products and services through 70,000 points of
distribution. Responsibilities: Involved in software development life cycle (SDLC) of tracking the
requirements, gathering, analysis, detailed design, development, system testing and user
acceptance testing. Actively involved in developing the methods for Create, Read, Update and
Delete (CRUD) in Active Record. Developed entire frontend and backend modules using Python
on Django Web Framework. Involved in designing user interactive web pages as the front end part
of the web application using various web technologies like HTML, JavaScript, Angular JS, JQuery,
AJAX and implemented CSS for better appearance and feel. Knowledge of cross-browser and
cross-platform development of HTML and CSS based websites in Windows like IE 6, IE 7, IE 8 and
FF. Used AJAX to modify small portions of the web pages by sending a request to the server

avoiding the need of reloading the entire web page Interactive in providing change requests, trouble reports and requirements collection with the client. Implemented and modified various SQL queries and Functions, Cursors and Triggers as per the client requirements. Managed code versioning with GitHub, Bit Bucket and deployment to staging and production servers.

Implemented MVC architecture in developing the web application with the help of Django framework. Used Celery as task queue and RabbitMQ, Redis as messaging broker to execute asynchronous tasks. Designed and managed API system deployment using fast http server and Amazon AWS architecture. Involved in code reviews using GitHub pull requests, reducing bugs, improving code quality, and increasing knowledge sharing Implemented monitoring and established best practices around using elastic search. Install and configuring monitoring scripts for AWS EC2 instances. Implemented task object to interface with data feed framework and invoke database message service setup and update functionality. Environment: Python 2.7, Django 1.7, HTML5, CSS, XML, KML, MySQL, JavaScript, Angular JS, JQuery, CSS Bootstrap, RESTful, MS SQL Server, MongoDB, Elastic Search, Ubuntu server, Windows 12 Server, Amazon s3, Jenkins, Map Box, My SQL, Mongo DB, GitHub, Bit Bucket, Linux, and Windows.

Python Developer Rockwell Collins - Cedar Rapids, IA November 2013 to January 2015 Rockwell Collins is a pioneer in the design, production and support of innovative solutions for our customers in aerospace and defence. Our expertise in flight-deck avionics, cabin electronics, mission communications, information management and simulation and training is strengthened by our global service and support network spanning 150 countries. Working together, our global team of nearly 20,000 employees shares a vision to create the most trusted source of communication and aviation electronics solutions. Responsibilities: Performed Systems Analysis and detail application design Worked on development and enhancement of automated tools for testing, integration and global application development. This includes detail description of availability. Also enhanced the check out and registration process. Work with team of developers on python applications for RISK management. Managed full-life development cycles Held overall responsibility of coordination of implementations of software builds and releases Provided analytics to help determine optimal way

to assemble releases. Tracked any additions, deletions or change in scope on the published release plan including efficient tracking of defects. Automating analysis of large data sets. Built the release plan roadmap and keep maintained for communication. Worked on UI modification using HTML, CSS. Developed Application logic using Python 2.7 and Django framework. Wrote backend data access Logic using MYSQL and SQL Server. Used Web Services to extract Supplier inventory for various high end items. Integrated the application with different internal system. Designed and implemented a distributed, QA infrastructure for automated testing of a multi process software product. Involved in Unit, integration and smoke testing. Designed and developed the UI of the website using HTML, AJAX, CSS and JavaScript. Developed entire front end and back end modules using Python on Django Web Framework. Designed and developed data center management system using MySQL. Rewrite existing Python/Django modules to deliver certain format of data. Used Django Database API's to access database objects. Wrote python scripts to parse XML documents and load the data in database. Generated property list for every application dynamically using python. Handled all the client side validation using JavaScript. Using Subversion version control tool to coordinate team-development. Responsible for debugging and troubleshooting the web application. Environment: Python 2.7, Django 1.8, MySQL, Windows, Linux, HTML, CSS, JQuery, JavaScript, Apache, Linux. Python Developer Activision Blizzard - Santa Monica, CA May 2012 to October 2013 Activision Blizzard global family of specialty retail brands that makes the most popular technologies affordable and simple. As the world largest multichannel video game retailer, sell new and pre-owned video game hardware, physical and digital video game software, video game accessories as well as new and pre-owned mobile and consumer electronics products merchandise primarily through our Activision Blizzard EB Games and Micromania stores. Responsibilities: Automation for execution of tests in batch using Shell scripting in python. Development of data structures, XML parsing using Python. Usage of advance features like pickle/unpickle in python for sharing the information across the applications. Used Django database API's to access database objects. Rewrite existing Python/Django modules to deliver certain format of data. Generated graphical reports using python package

Numpy and matplotlib. Representation of the system in hierarchy form by defining the components, subcomponents using Python and developed set of library functions over the system based on the user needs. Development of Python APIs to dump the array structures in the Processor at the failure point for debugging. Wrote programs to parse excel file and process many user data with data validations. Create Cassandra database to handle the user's data (server-client). Developed front end page using HTML, CSS, JavaScript and JQuery. Generated property list for every application dynamically using python. Collecting the several usage models and functions from the team members. Developing and maintenance of the tool that abstracts the information for the user. Implemented multiple high performances MongoDB. Utilized various IDEs and internal debug tools during debugging. Analyzing the data in design database. Used SVN for version control. Maintaining the data with different levels of access privileges.

Environment: Python, Django, Linux, HTML, CSS, MongoDB, Cassandra, Web services, SVN. Jr. Python Developer Medivation Inc February 2011 to April 2012 Responsibilities: Create a Python application for ERM system. Used Django web based apps for Insurance premium calculations. Designed and developed components using Python. Designed unit test framework for new code. Used GIT Subversion version control tool to coordinate team-development. Implemented database access and data manipulation functions using MySQL. Update and Replace Java, C++ application in Python. Designed the architecture of the hardware environments and methodology of the code.

Experienced in Agile Methodologies and SCRUM Process. Involved in entire lifecycle of the projects including Design, Development, and Deployment, Testing and Implementation and support.

Used Pandas library for statistical Analysis. Used Numpy for Numerical analysis for Insurance premium. Environment: Python, Django, MySQL, Linux, HTML, GIT, CSS, JavaScript and Apache Web Server. Java Developer USAA - San Antonio, TX June 2008 to December 2010 Involved in Design, Development and Support phases of Software Development Life Cycle (SDLC) Reviewed the functional, design, source code and test specifications Involved in developing the complete front end development using Java Script and CSS Author for Functional, Design and Test Specifications Implemented Backend, Configuration DAO, XML generation modules of DIS

Analyzed, designed and developed the component Used JDBC for database access Used Data Transfer Object (DTO) design patterns Unit testing and rigorous integration testing of the whole application Written and executed the Test Scripts using JUNIT Actively involved in system testing Developed XML parsing tool for regression testing Prepared the Installation, Customer guide and Configuration document which were delivered to the customer along with the product

Environment: Java, JavaScript, HTML, CSS, JDK 1.5.1, JDBC, Oracle10g, XML, XSL, Solaris and UML Education Bachelor's Skills CSS (8 years), HTML (8 years), JAVASCRIPT (8 years), DJANGO (7 years), PYTHON (7 years) Additional Information Technical Skills: Languages Python, Java, Perl, C, C++, HTML, CSS, Ant, Maven, JavaScript and Shell Script Python Framework Django, Flask framework Databases MySQL, MongoDB, SQL Server, Oracle and PostgreSQL Versioning Tools Git, SVN, CVS Web servers Apache, Flask Operating systems Linux/Unix, Windows
