

Network Engineer, Consulting Firm Network Engineer, Consulting Firm Network Engineer, Consulting Firm Culver City, CA Responsible Network Professional with comprehensive experience scheduling conversions and cutover. Extensive experience monitoring, tracking, and evaluating global IT infrastructure incidents. Network Engineer/ Administrator with extensive experience with High Availability environments, implementation and management. System analyst specializing in object-oriented analysis and design. Enthusiastic Network Engineer/ Administrator proudly offering over 15 years' experience in system upgrades, hardware monitoring and performance improvements. An astute employee with knowledge in system repairs and the installation of network components. Skilled in task prioritization and troubleshooting. Intelligent Network Administrator with exceptional insight into computer security and tasked with implementing firewalls, VPNs and anti-malware technologies. A diligent employee with expertise upgrading networks, software and hardware. Ready for a new position that involves troubleshooting and issue resolution in the IT environment. Results-driven IT professional well-versed in MS Enterprise Systems, network engineering, project management and product support. Strategic leader with an organized approach and talent for building long-lasting relationships. Proficient in recovery planning, project mapping and training with the ability to problem-solve and conduct critical analyses. Committed to providing high-level solutions that drive business and provide outstanding cost efficiency. Skilled System Administrator focused on performance optimization and technical improvements with an understanding of cost-effective decision making and usability. Developer well-versed in structuring, developing and implementing interactive websites. Work Experience Network Engineer, Consulting Firm Fothion - Sherman Oaks, CA February 2019 to July 2019 assigned to Cadence Aerospace in Anaheim, CA ? Supported Network and Systems Operations in a generalist role where supported Route, Switch, Firewall/Security, Wireless, Active Directory Services, and Load Balancing across 12 offices with 1 Data Center in Anaheim ? MPLS with Site-to-Site VPN connectivity across the offices to the Data Center ? Environment consisted of HP/Cisco Routers and Switches, SonicWALL Firewalls, and Aruba Wireless ? Created and documented the disaster recovery plan (DRP) as well as implemented and designed penetration/vulnerability testing inside out and outside ?

Documented the network including the rack elevation backbone and create the wiki for level one and two tech support ? Implemented the onsite and offsite backup with datto and open source backup solutions ? Reviewed and corrected the miss configuration on routing, firewall and switching BGP, VLANing port security ? Entered information from customer calls and onsite service visits into the company's system using SolarWinds ? Wrote agendas and notes and sent out automatic notifications for upcoming meetings ? Planned and executed Security box for pen test network monitoring and log management LEM Network Engineer GHCropes September 2018 to February 2019 Performed network documentation and created disaster recovery plan ? Setup Cisco Entersight IDS and Cisco Works for Windows network monitoring ? Setup Juniper routers for carrying MPLS to service the users ? Oversaw migration of WAN links to new service provider, designed full mesh WAN, set up TFTP server to backup, and restored configuration and IOS image files for the PIX, Cisco routers, and Catalyst switches ? Analyzed expanding network, ran fiber, and implemented wireless communication ? Designed configuration and layout of WAN to include Internet facing VPNs and wireless subnet ? Migrated network from full mesh frame relay to Point-Point T1 on larger sites, and implemented IPsec VPN on smaller sites 8185408113 5015 sawtelle blvd culver city ca 90230 ? Administered multiple PIX firewalls throughout WAN to ensure LAN integrity from external threats ? Monitored bandwidth and network activity by analyzing information provided by MRTG to ensure both efficient and effective network operation ? Configured and supported multiple remote site installations ? Led team of 15 system admin engaged in delivering assistance to customer service department on daily basis Network Engineer Motor Vehicle Software Corporation - Agoura Hills, CA June 2012 to September 2018 Network Engineer in environment that consisted of over 50 employees spanning across 20 states with connection to over 6K automotive dealerships and the DMV utilizing MPLS/BGP ? Migrated the main Data Center to Switch in Nevada with two redundant DC's in Agoura Hills and Down Town Los Angeles ? Environment was Cisco heavy with Cisco routers and switches at each site and data center including Catalyst core, edge, and access switches, Cisco ASA Firewalls (some NextGen with FirePower), Cisco Meraki AP's/WLC, and F5 LTM Load Balancers. Some Juniper SRX for

internal security specific to government network that connected to the DMV ? Developed work-flow charts and diagrams to ensure production team compliance with client deadlines ? Managed creative projects from concept to completion while managing outside vendors ? Diagnosed and troubleshoot UNIX and Windows processing problems and applied solutions to increase company efficiency ? Recommended architectural improvements, design solutions and integration solutions ? Designed SharePoint masterpage and page layouts, serving as company's main SharePoint support for all technical complications ? Established compatibility with third party software products by developing program for modification and integration ? Designed and implemented new server standards for core business services ? Streamlined and enhanced the corporate accounting and operations system ? Built application platform foundation to support migration from client-server product lines to enterprise architectures and services ? Monitored network performance and provided network performance statistical reports for both real-time and historical measurements ? Ensured network, system and data availability and integrity through preventative maintenance and upgrades ? Recommended network security standards to management ? Provided methodologies for object-oriented software development and efficient database design ? Designed strategic plan for component development practices to support future projects ? Developed and implemented complex Internet and Intranet applications on multiple platforms ? Utilized a pipe and filter model to find bottlenecks and enable measurement of system resource usage and process behavior at boundary limits of all operations ? Proposed technical feasibility solutions for new functional designs and suggested options for performance improvement of technical objects ? Aligned office departments and increased inter-department communication and data sharing 8185408113 5015 sawtelle blvd culver city ca 90230 ? Developed data architecture design to enable analysts to perform targeted customer analysis ? Managed firewall, network monitoring and server monitoring both on- and off-site ? Led team of 35 software and system administrator engaged in delivering assistance to customer service department on daily basis ? Planned and executed active-active and active-passive Data Center Senior Network Administrator Extreme, Inc - Los Angeles, CA June 2011 to January 2012 Monitored network performance and provided network performance statistical

reports for both real- time and historical measurements ? Recommended network security standards to management ? Developed and implemented complex Internet and Intranet applications on multiple platforms ? Trained junior members of IT team regarding network security and troubleshooting of data circuits ? Managed firewall, network monitoring and server monitoring both on- and off-site ? Ensured network, system and data availability and integrity through preventative maintenance and upgrades ? Supervised and provided direction for six technical direct reports regarding network activities ? Managed creative projects from concept to completion while managing outside vendors ? Developed data architecture design to enable analysts to perform targeted customer analysis ? Diagnosed and troubleshooted UNIX and Windows processing problems and applied solutions to increase company efficiency ? Advocated for end-users to perform testing and problem analysis for server, desktop and IT infrastructure work ? Developed work-flow charts and diagrams to ensure production team compliance with client deadlines
