

Scrum Master (Python/Angular) Scrum Master (Python/Angular) Scrum Master (Python/Angular) - Google(E-Touch) Irving, TX Michael is a very detail oriented full-stack Engineer who has recently learnt his expertise to a front-end architecture development, which includes, HTML5, CSS3, JavaScript, JQuery, Angular 2. He has created visual assets for prototype and application developments. He has created high-level digital artefacts, such as wireframes, interaction flows, and screen specifications. He has experience in customizing Social Network websites, such as Facebook and Twitter. He has created several websites using CSS, HTML, JavaScript, MySQL, SQL Server, PHP, .NET, Drupal, Joomla, online payment features, and form processing. He has Hands-on experience with Visual Design tools used for assembling web graphics and logos, such as Photoshop, Fireworks, and InDesign. He has delivered a complete front-end application with angular 2. He has ensured high performance on mobile and desktop. He has written, tested, idiomatic, and documented JavaScript, HTML and CSS. He has translated concepts into wireframes and mock-ups that lead to intuitive user experiences. He has facilitated client's product visions by researching, conceiving, wireframe, sketching, prototyping, and mocking up user experiences for digital products. He has designed and delivered wireframes, user stories, user journeys, and mock-ups optimized for a wide range of devices and interfaces. He has identified design problems and devise elegant solutions. He has made strategic design and user-experience decisions related to core, and new, functions and features. He has taken a user-centred design approach and rapidly test and iterate your designs. He has collaborated with other team members and stakeholders. He has the ability to take smart risks and champion new ideas.
