

Database Administrator Database Administrator Database Administrator - IDR/Nashville Metro ITS  
Nashville, TN Work Experience Database Administrator IDR/Nashville Metro ITS - Nashville, TN  
May 2018 to Present Contributed to strategic direction for the database team and functioned as the  
technical/project leader on database projects Provided consulting for database design and  
development assistance to vendors, application support teams and city entities Responsible for  
daily support tasks such as configuration management, backup/recovery, performance optimization,  
and space management Reviewed database design and integration of systems and made  
recommendations pertaining to enhancements or improvements Setup and maintained transaction  
replication Provided consulting for internal departments and city entities for database design,  
tuning and troubleshooting Co-ordinated with customers and other city entities for patching and  
server upgrades Performed routine and emergency maintenance and support during and after  
business hours Aided other departments, vendors and city entities with integration packages  
application integration Researched and compiled timelines for legacy database migrations, DB  
server end of life projection, patching and version support for all ITS databases Database  
Administrator Rezult Group/Surgery Partners LLC - Nashville, TN May 2017 to May 2018  
Configured always on availability groups and replication services Performed Legacy database  
migrations to SQL Server versions 2014 and 2016 Implemented third party monitoring and  
backups tools (Solar Winds, SQL Safe and Spotlight) Installed, configured, monitored and  
provided optimization recommendations for SQL Server Databases Created standardization  
documentation for DB installs, setup, maintenance and backups Responded to change request  
and trouble tickets in a timely manner Routinely performed after hours operations (patches,  
changes and data transformation package deployments) Database Administrator iTech/Cigna  
Health Spring - Nashville, TN September 2016 to January 2017 Setup, tested and monitored  
backups daily using queries and third-party tools such as Idera SQL Safe Routinely deployed  
database change scripts provided by third party vendors Installed and configured new SQL  
Servers Implemented OLA maintenance and index scripts on all servers within set time-lines  
Worked as part of a year-end initiative to update all servers to current service packs Migrated

older server from SQL Server 2005 and 2008 editions to SQL Server 2014    Worked as part of a year-end initiative to ensure database security managing users and groups    Worked daily to complete tickets ranging from adding users to troubleshooting database performance    Setup, monitored and maintained replication services    Part of a 24/7 on-call rotation Database Administrator II Kforce/Baylor Scott & White - Temple, TX January 2016 to July 2016    Monitored, configured and maintained SQL Servers for optimal performance, high availability and health    Lead an initiative to standardize database backups and maintenance jobs for SQL Server DBs    Created standardized documents for DBA use with installations, backups and maintenance    Working as part of a team testing the potential of migrating databases to Microsoft Azure    Responded in a timely manner to tickets (tasks and incidents) within provided SLAs using Service Now    Performed evaluations for database performance and optimization and implemented changes    Performed upgrades from SQL Server 2000 up to SQL Server 2012    Provided automation recommendations, tracking and documentation    Utilized Best-Practices to improve processes, procedures, installations and maintenance    Part of a 24/7 on-call support rotation for mission critical systems Database Administrator Apex/DaVita - Denver, CO June 2015 to September 2015    Monitored and maintained multiple life-cycle environments for Oracle and SQL Server DB's    Managed data refreshes or special request in support of production, development and QA instances    Initiated and monitored Data Pump imports and exports using Jenkins and Delphix    Managed database release code from 4 different internal development groups    Analyzed and performed SQL query tuning to increase Oracle and SQL Server databases    Created, tracked and responded to trouble tickets using Service Now    Created and managed jobs for SQL Server 2012 Junior Applications Administrator PDS/Canoe Ventures - Denver, CO October 2014 to May 2015    Provided support to Applications Engineer by monitoring and troubleshooting TC Server applications    Assisted DBA with creating, monitoring and tuning various database objects such as tables, triggers, indexes, tablespaces, storage, SGA components as well as user creation and management    Perform tasks in Windows/Linux/environments    Monitored error logs and tested data flows in and out of applications    Assisted in the migration of production and non-prod environments to various data

centers Participated in the setup and creating of DR environments Created work-flow documents utilized in troubleshooting, planning & consolidation of resources Database Administrator Cerner Corporation - Kansas City, KS October 2013 to October 2014 Performed SQL commands using Linux command line (SQL\*Plus), SQL Developer, MS Management Studio, MySQL Workbench and Oracle Enterprise Manager Performed database backups and restore operations for Oracle and MS SQL Server Performed scheduled and emergency maintenance and support for client database systems Experienced in different aspects of database administration such as creating and managing users, tablespaces, indexes, tables, triggers as well as other components Experienced in performance tuning and optimization as well as post tuning follow up Utilized Oracle Enterprise Mgr 12c for Oracle DB monitoring, maintenance, tuning and troubleshooting Performed troubleshooting of Oracle 11g database systems in a Linux environment Implementation of backups, tuning, patches and maintenance as needed for database systems Analyzed, fixed and solved issues in real time providing end-to-end resolution Education Master's Skills DBA, Sql Server, Sql Db, Sql Database
