camera and view images captured. * Demo of website: www.bartelranch.com/picam Username:
user Password: password * Progression of project: www.bartelranch.com Server Socket
Connection to PLC Personal Project 2013 to December 2013 12/2013 This project is a java based
application that is listening for client(s), where the client is the PLC, to receive messages and send
back the message to the PLC to confirm message was received. Application also provides user with
a timestamp of when a client has connected, received message from client, and sent message to
client. The user can also save the event log as a text file. Data Entry Human Resource Department,
University of West Georgia - Carrollton, GA January 2007 to June 2007 Updated and organized
sensitive information as well as creating query's to help functionality of the database using Microsoft
Access Education Computer Science Gwinnett Technical College - Lawrenceville, GA September
2007 to June 2011 Associates in Computer Science Colorado Technical University June 2011
Computer Science University of West Georgia - Carrollton, GA August 2006 to June 2007 o College
Algebra Skills JavaEE 6 & 7, HTML4 & 5, CSS, PHP, Python, JavaScript, JQuery, Laravel (MVC
Framework), JDBC, Relational Databases, MySQL, Google Maps API, Authorize.net API in java and
