

Senior Front- End Developer Senior Front-End Developer Senior Front- End Developer Oak Creek, WI Authorized to work in the US for any employer Work Experience Senior Front- End Developer DCi Artform - Milwaukee, WI July 2018 to April 2019 Help build and maintain their LiveGuide 2.0 application. Using HTML5, CSS3, JS, JSON, VueJS, Swagger, Azure. Worked closely with UX team to ensure our application can perform in a sensible and easy to understand UI. Senior Interface Developer Alere Health Management / Optum Inc April 2014 to June 2018 Build and maintain company's existing Web applications. Using HTML5 CSS3 JS and JSP. Also work with a team to ensure the right technologies are being used to help mobility, scalability and performance. Worked closely with Design and UX team to also ensure right technologies are available for application needs. Even though it was not required, I am able to help with any Sketch/Adobe CC related UX designs when requirements change. I've introduced Angular.js to my team as a web application solution. Our team consists of UX, Designers, Java Developers and Front End Developers. In the attempt to organize our UI components, we've split things up into two parts. The HTML and CSS components, which visually show a real world scenario of what the designs looks like and a JavaScript pattern that host everything JS to run certain components that requires it. Angular helped us organized these components from a template stand point and re-usability. Angular also gave us the opportunity to run certain parts of the web application into Single Page App (SPA). Skills used: HTML5, CSS3, Angular.js, Material, Bootstrap, Bootstrap.js, JQuery, ADA Compliance, Sketch, OmniGraffle, Pega7 UI Design, Struts, Bitbucket, Node, ES6+ Sr. Front End Developer Alere Health Management / Optum Inc 2015 to 2016 Build a front- end application for multi-loans. Maintain the smallbusiness section of the verizon.com website using wordpress, asp and JavaScript (mootools) Skills used: HTML, CSS, JQuery, Mootools, Wordpress, Freemarker. Sr. Front End Developer Community Connect/Interactive One - New York, NY 2006 to 2008 Community Connect, Inc. (CCI) Build and maintain widgets and modules using XHTML, XML, XSL, XSLT, CSS, JavaScript, for 10+ social networking sites under one code base. Admin various sites to provide optimum user satisfaction. Often trusted to produce solid and stable code for marketing and production development during tight deadlines. Quickly adapted knowledge of Morpheus, an application created by CCI, used to build modules and templates in XML, XSL, XSLT, for prototyping front- end designs before initial PHP integration. Morpheus is the core front- end framework for building a variety of social networking sites under one code base. Invented a parser called switch. Using switch, authors can use "special functionality not available in CSS" that

functionality is written in a syntax that is similar to CSS. Features such as Math, Variables and short hand are all compiled into this language. Skills used: HTML, CSS, YUI, Word press, XML, XSL, Agile and XSLT. Lead Front End Developer / UI Designer Fareportal - New York, NY 2005 to 2006 Front End developer for a air traveling company, Fareportal.
