

Front End Web Developer Front End Web Developer Front End Web Developer - Sonicpress St. Louis, MO Work Experience Front End Web Developer Sonicpress - St. Louis, MO August 2001 to Present Responsible for the creation, updating, hosting and overall project management of client websites. Uses HTML5, CSS3, SASS, JavaScript, jQuery, Bootstrap, PHP, Wordpress, Photoshop, Dreamweaver and Sublime to create responsive websites. Websites have been created for a cross section of clients that include: a printing company, a travel site, a martial arts studio, a church, a funeral home and a blog amongst them. A recent project that showcases many of these technologies is a travel information site called dominicansoul.com. This site uses HTML, Bootstrap and it's grid system to make it responsive and mobile friendly. It uses CSS for general styling and customizing Bootstrap. It uses jQuery and JavaScript for certain aspects of the site like drop down menus and photo carousals. It also uses PHP to authenticate the site's contact form. Was responsible for transitioning Sonicpress from predominately a printing company in web design, web development, graphic design and social media marketing company.

Graphic Designer Responsibilities include graphic design, prepress, typesetting, artwork and video editing, and client consultation. Uses Adobe Creative Suite, QuarkXpress and Microsoft Office to create and edit artwork for clients. Education Web Design and Development Full Sail University - Orlando, FL March 2015 to December 2015 AA degree in Graphic Design Forest Park Community College - St. Louis, MO August 1986 to May 1989 Links <http://linkedin.com/in/michael-dodson> <https://github.com/MIGHTMIKE1968> Additional Information
