

Software Engineer Software Engineer Software Engineer Saratoga Springs, NY Seasoned technologist with over ten years of experience fulfilling diverse business demands in entrepreneurial environments as well as worldclass companies such as Nielsen, Gracenote Inc, Xerox Corp, and the NFL. Known for operating a highly efficient team passionate about delivering effective technical solutions. Authorized to work in the US for any employer Work Experience Software Engineer Transfinder - Schenectady, NY August 2018 to June 2019 Web and mobile application development on iOS and Android platforms for school transportation and map routing solutions. As as one of the more senior engineers my duties include code reviews, git merge request, and release management in addition to the ordinary development responsibilities of each engineer.

Technologies Used: Git, HTML, CSS3, JavaScript (ES6), Typescript, Angular 7, NodeJs, Grunt, .NET, Apache Cordova Software Engineer SportsHub Technologies - Remote June 2018 to January 2019 As a frontend developer I built fantasy sports games and community features for the daily fantasy sports site, Fanball.com. Primarily I built an auction engine with VueJS and Pusher (PubSub) which let 6 owners bid on a pool of players 4 at a time. See a demonstration here:

<https://www.youtube.com/watch?v=-tR6WdlZhTI&t=530> Technologies Used: Git, HTML, CSS3, JavaScript (ES6), VueJS, NodeJs, Grunt Software Engineer Gracenote, Inc. - Queensbury, NY January 2015 to June 2018 Managed a team of three engineers who produced a sports and TV metadata product called OnEntertainment Sports which was presented at CES in 2016 and makes about \$2 million a year for Gracenote. The platform uses Ruby scripts to ingest raw sports data, hits an API built with Groovy and publishes processed data to a Kafka queue where it populates a Mashery API. Designed and developed an editorial interface for our internal sports data using AngularJS, and Ruby on Rails. Its Javascript dependencies were managed with npm and bower.

The sass style sheets and javascript files were compiled and minified using grunt tasks. Resources were provisioned and deployed to AWS using ansible. Technologies Used: Git, HTML, CSS3,

JavaScript, AngularJS, Ruby on Rails, AWS, Ansible, NodeJs, Grunt, Kafka Application Developer

Xerox Litigation Services - Albany, NY September 2013 to January 2015 Served on the team who designed and implemented a complete user interface redesign for the company's flagship

eDiscovery platform. We also implemented bandwidth saving, asset compilation improving page load speeds by 30%. Technologies Used HTML, CSS, JS (ReactJS), PHP, Oracle Co-Founder Five1Eight Internet Media LLC - Albany, NY 2011 to 2013 Designed and developed a play-money sports wagering platform that simulated a sports gaming experience.
