

ETL developer ETL developer ETL developer - USAA / HCL Technologies San Antonio, TX Looking for SQL server database administrator position where I can utilize my experience and educational background. Work Experience ETL developer USAA / HCL Technologies - San Antonio, TX July 2018 to Present Good experience on creating all reports such as matrix report, drill down report, drill through report, sub report and chart report etc. Created and Deployed reports to Report Manager and Troubleshooting for any error occur in execution Proficient in the use of T-SQL for developing stored procedures, triggers, tables, user-defined functions, relational database models and data integrity, SQL joins and query writing Experience in Performance Tuning and Optimization of queries and stored procedures Created and managed users, roles and assigning necessary permissions for SQL Server security. Handling dead locks, scheduling and maintaining jobs and automatic e-mail notifications Database development experience with Microsoft SQL Server in OLTP/OLAP environments using integration services (SSIS) for ETL (Extraction, Transformation and Loading). Database Administrative skills including, backups, recovery, database maintenance.

Experience in transforming unstructured data from various data sources using SSIS Transformations like Conditional Split, Lookup, Merge Join and Sort and Derived Column for cleaning bad data, validating data Designed ETL packages for loading and scrubbing vendor data Database Administrator Regis University - Denver, CO May 2017 to May 2018 Managed and maintained Regis University's database using SQL 2012 server. Oversaw performance tuning and optimization of data, indexes, stored procedures and queries. Troubleshot and corrected SQL Server performance issues Created stored procedures and SQL scripts to create database and database objects. Oversaw the backup and restoration of the database. Maintained data integrity by Creating checks and constraints Created user credentials, system privilege and appropriate roles for users. Provided technical support for database users. Oversaw the database for referential integrity, data consistency, and proper indexing to maintain high quality data that can be used for reporting Utilized T-SQL for developing complex stored procedures, triggers, tables, user-defined functions, relational database models and data integrity, SQL joins and query writing. Education Master of Science in Database Technology in Database Technology Regis

University - Denver, CO May 2018 Certificate University of Phoenix - Phoenix, AZ June 2016  
Bachelor of Science in Management and Information Systems in MIS Unity University - Addis  
Ababa, ET September 2013 Skills Sql server, Sql server 2005, Oracle, Sql, Etl, Olap, Ssrs, Tableau,  
T-sql, Shell scripts, Unix, Unix shell, Web sphere, Excel, Microsoft office, Outlook, Powerpoint,  
Word, Data Warehouse, Ssis Additional Information 2 years of experience in role of a Microsoft  
Business Intelligence Developer Experience in installation, development, administration, tuning,  
jobs, and backup of SQL server databases. Experience in MS SQL Server 2005, 2008 and 2012  
with Business Intelligence in SQL Server Reporting Services and SQL Server Integration Services  
Experience in using the Microsoft Suite (Management Studio, Business Intelligence Development  
Studio) (SQL) Server Integration Services (SSIS), SQL Server Reporting Services (SSRS), SQL  
Server Analysis Services (SSAS) Software Proficiencies: Microsoft Office (Word, Access, Excel,  
Outlook and PowerPoint) Databases: SQL Server 2005, 2008, 2012; Oracle 11g Programming  
Languages: T-SQL OLAP Tools: SSRS ETL Tools: SSIS, IBM Web Sphere Data stage and  
Quality Stage Unix Shell Scripts Tableau
