

Sr. Frontend UI Developer Sr. Frontend UI Developer Sr. Frontend UI Developer - BERKSHIRE HATHAWAY Chicago, IL Having 8+ years of experience in 'software development life cycle (SDLC) in developing and designing user experiences of Internet/Intranet applications using HTML5, HTML, CSS, CSS3, AJAX, DOM, JavaScript, jQuery, AngularJS, ReactJS and NodeJS. Experienced with HTML5 Semantic Elements, Media, Graphic Tags and HTML5 API's. Worked on CSS3 Media Queries, CSS Background, CSS Positioning, CSS Text, CSS Border, CSS Margin, CSS Padding, CSS Table, Pseudo Classes, Pseudo Elements and CSS Behaviors in CSS. ' Proficient in developing responsive web pages RWD using Bootstrap, CSS3 Media Queries. Implemented Maintainable CSS code using SASS css preprocessor. Extensive experience in various UI widgets using JavaScript libraries (jQuery) and developing Rich Internet Applications RIA. Implemented Model View Controller (MVC) Design Pattern using AngularJS Experienced in working with React, with state management using Redux architecture. Working with ES 6 features. Used Babel, web pack with es2015, react JSX presets. Working with React Router for developing Single Page Applications SPAs. Developed reusable components with AngularJS custom directives. Used Dependency Injection from AngularJS factory and services. Used routing schemes to develop single page applications (SPAs) using AngularJS. Responsive Web Design (RWD) for different types of Devices like tablets and mobiles using media queries and libraries like bootstrap. Experience in Developing User Interface (UI) Rich Web Applications, and Web Service Applications using Front End/User Interface (UI) Technologies like Object Oriented JavaScript, Type Script, Angular 2, Angular 4, JS, Node JS, Bootstrap, Media Queries, CSS Frameworks, Java. Expertise in Angular 2/4 framework and its ability to create simple and scalable code for SPA. Used key features of AngularJS like two-way data binding, templates, services, controllers, scope, custom directives, filters, dependency injection to get, post and represent data from database to the web browser. Work Experience Sr. Frontend UI Developer BERKSHIRE HATHAWAY - Charlotte, NC July 2017 to Present Responsibilities: Worked on VolunteerMark which is an online software application USING Javascript environment Involved in Requirements gathering, analysis, design and documentation of the Maryland State Government project from scratch and involved with

business partners to gather business requirements.      Worked with HTML5, CSS3, JSP, XML, JSON, JavaScript, JQuery, AJAX      Developed one news in framework 7 with meteor in node js

Developed source code to consume JSON response received through AJAX calls using jQuery.

Experience on various JavaScript Frameworks depending on the use case (e.g. jQuery, React JS, Angular JS)      Designed responsive web page for Mobile using bootstrap.js. framework      Used REST client / POSTMAN to check the response of various API's, Swagger UI as a visual documentation for back- end implementation and client-side consumption. Handled various exceptions based on the response.      Building mobile application using Android on normal PHP, Backbone JS      Worked with Linkites application on technology React js,      Worked on a website dealing specifically to reserve bus tickets to know where and all bus service is provide, cost reduction and easy to access of place to travel around using CSS web technology      Developed HTML5 Video Player business application to play VOD and LIVE content along with video ads from multiple sources basis geo on a multitude of screens.      Experience in upgrading the database from Oracle 10g to Oracle 11g/12c and migration of the databases using transportable database

Experience in executing concurrent programs from PL/SQL.      Designed various applications on JDBC language      Reviewed and edited the SOPs and Maintenance manuals (Linux, Cassandra, VMware, Webmaster)      Analyzed, designed and developed multiple applications related to interactive product experience and product showcase on REST      Worked on EHR project on Environment: Java Windows 7, PostgreSQL, Eclipse,      Have done Tuning and Maintenance of WebLogic Server versions      Creating AMI and snapshot for EC2 instance before any scheduled maintenance with GIT      Worked on Ams Tool which is very helpful for applicant tracking in recruitment process and CRPO Tool is very helpful for tracking campus candidates using GitHub tool      Used Karma for unit testing and Protractor and Jasmine for end to end testing.      Extensive work experience in Product Collaboration module of Agile, Customization (Process Extension development using SDK) and Configuration Management.      Hands on experience with Eclipse IDE along Maven      ENVIRONMENT: JQuery, AJAX, JavaScript, Node.js, Angular.js, bootstrap.js, backbone.js Java, J2EE, Spring, Hibernate, Struts, Oracle, CRUD, PL/ SQL, JDBC, coherence,

Mongo DB, APACHE CXF, REST, Eclipse, Weblogic, Subversion (SVN), Junit, Agile, UML, JSP, Java Server Pages Standard Tag Library (JSTL), SERVLET, MAVEN, ITEXT, Jasper report, ILOG, Web 2.0 and SOA Sr. UI Developer COMCAST CORPORATION January 2016 to June 2017

Responsibilities: Built rich prototypes and 3rd party applications using HTML5, CSS3, JavaScript, jQuery, AJAX, JSON, AngularJS, Backbone.JS and Bootstrap with Oracle database. Build Single Page Applications (SPAs) and PWA using react, redux, Javascript (ES6) with backward compatibility and polyfill provided by Babel, node, Express, MongoDB Designed and implemented the User Interface using Angular JS MVC framework (JavaScript, HTML5, and CSS3), JQuery, AJAX. Implemented of a Online Crime Information System with the help of J2EE language (Advanced Java) which included HTML, Servlets, CSS and JavaScript Developed HTML5 Video Player business application to play VOD and LIVE content along with video ads from multiple sources basis geo on a multitude of screens. Lead the team's HTML5/CSS-3 development efforts while creating two responsive (bootstrap) web apps. Produced style guides for web and mobile devices and implemented all UI functionality according to spec. Created Server API for Cryptocurrency App in Node JS Expertise in building strong websites confirming Web 2.0 standards using Yahoo User Interface (YUI) Framework, jQuery, Angular.js, React.JS, HTML5, XHTML, DHTML & CSS3 to develop valid code and table-free sites. Experience in making Responsive web pages (RWD) using Bootstrap.js, RESTful API web development and media queries and Expertise in debugging and troubleshooting existing code. Used Ext.js for building rich internet applications, backbone.js, & Require.js to optimize in-browser use and to load the module and to improve the Speed Developed Page level code using JavaScript with Angular.JS framework along with jQuery and other JavaScript libraries.. Developed Form Bean, Controller, Service, DAO classes, Table Beans (Model) for Spring Strong understanding of Development and Implementation and knowledge of various technologies like Java, Servlets, JSP, Html5, Hibernate Developed multiple DB2 stored procedures as per the requirement and provided for UI. Worked on Database using MySQL for CRUD operations in the modules. Developed code on PL/SQL for FIEL CPS application deals with adding/modifying/deleting the customer details for the bank Experience

with high availability setup for MongoDB clusters and scaling data using sharding technique

Expertise in Web-Development technologies including: AngularJs, HTML, DHTML, JavaScript, CSS, JQuery, XML, XSLT, XPATH, DOJO, AJAX, SOAP with W3C standards. Hands on experience in J2SE and JEE

Developed REST Webservice which communicate android and iOS phone to GeoTrak Application,

Designed and developed functionalities in MVC pattern in eclipse environment

Extensively worked on analyzing and developing applications using JSR286 and J2EE for WebSpherePortal Server

Diverse experience utilizing Java tools in Web and client-server environments including Java Platform, Enterprise Edition (Java EE), EJB, JSP, Java Servlets (including JNDI), Struts, JDBC, Spring and Hibernate technologies (like Hibernate With JPA), JReports, JMS, Java Script, and its Framework like Ext-JS, JQuery, AJAX, DOJO, JSON, Log4J and expertise on IDEs such Eclipse and WSAD.

Worked on MCV project using Subversion Control System (SVN)

Expertise in Selenium automation using Selenium WebDriver, Selenium Grid, JAVA, JUnit, TestNG, Maven, GIT, Ant and Jenkins

Worked with Jasmine for end to end testing

Conducting and Chairing all Scrum Ceremonies like planning, daily scrum, sprint demos, sprint retrospectives

Strong technical skills in UML, Java, J2EE, JSP, Spring/Hibernate, SOAP, Node JS, SQL and Relational Databases

Handled spring mvc rest angular Maven project and doing end to end development. Also have experience in spring mvc jsp.

Developed and maintained XML files independently based upon client instruction.

Responsible for quality assurance of finished websites including the validation of web forms and links.

ENVIRONMENT: DOJO, Sencha ExtJS, JavaScript, CSS, AJAX, Html5, Node.js, Angular.js, bootstrap.js, backbone.js, Java, J2EE, Spring, Hibernate, Struts, JSF, DB2, CRUD, PL/ SQL, JDBC, coherence, MongoDB, APACHE CXF, soap, Web Services, Eclipse, WebSphere Portal, WebSphere Commerce Developer, WebSphere Integration Developer (WID), WebSphere Studio Application Developer (WSAD), Git, Github, JUnit, Scrum, UML, JSP, Java Server Pages Standard Tag Library (JSTL), SERVLET, MAVEN, Xml, ITEXT, JIRA, Jasper report, ILOG, JRules, Web, SOA, JMS, Apache Tomcat, Linux and PHP Front end Developer

WORKDAY. INC - Bloomfield, CT January 2015 to December 2015 Responsibilities:

Expertise in management of project assignments right from inception till implementation &

production support and ensuring deliverables within assigned time, quality & cost parameters with JQuery technology      Providing authentication access to different services.      Involved in Agile process, two week Sprints, and daily Scrums to discuss the development of the application. Expertise in developing responsive forms and pages via Bootstrap, Foundation, and Materialize, SASS/CSS, jQuery, Javascript, Ajax, and REST components      Developed CRM application using Ajax, Javascript, CSS      Involved in Requirement gathering phase in order to gather the requirements from the business users and dealing with UX team to continuously accommodate changing user requirements. Expertise in client side designing and validations using HTML5, DOJO, CSS3, JavaScript, JSP and Struts Framework.      Experience in Sencha ExtJS frameworks in AJAX-driven websites using proxy to get the data from the back- end in the form of JSON and XML to populate on the UI components      Experience in Spring/Hibernate/REST based J2EE server development.      Experience of JAVA, SQL, iBatis, Apache Wicket, Spring DI, Spring MVC, Spring BOOT and Hibernate.      Worked on Cashback website on struts framework      Design & develop IT Software (covering integrated process, applications, data, infrastructure, security & other technologies) to resolve business requirements with JSF tool      Designed and developed in interface framework to keep the application of the JBPM Interaction with EJB classes      Worked as Developer as well as working on Requirement Analysis using MYSQL database      Designing the Test strategy, Defects user documentation and Functional specification (FS) documents using TOAD      Designed and implemented different layouts using HTML5, CSS3, Sass, AngularJS, .Net Frameworks, SQLServer, JavaScript, JQuery, Owl-Carousel.      Developed multiple DB2 stored procedures as per the requirement and provided for UI.      Used Restful API's to make calls to the backend server using Coherence environment      Implemented the validation, error handling, and caching framework with Oracle Coherence cache.      Designed dynamic and multi-browser compatible pages in Apache axis 2      Designed and built signup and login pages using HTML and JavaScript and used Parse to save user information in the back- end in WSDL environment      Worked on Specific Coding Editor using NETBEANS      Experience with JBoss application servers, Tomcat.      Experienced in Version control system like Mercurial      Working experience of control version tools like SVN and GIT.      Developed

BDD test scripts in cucumber using selenium Web Driver (Using page object model) and integration tests with Jenkins., Expertise in employing Water Fall Model and best practices for software development. Experience in building stable React components and stand-alone functions to be added to web pages using UML Used backbone JS&Require JS to optimize in-browser use and to load the module and to improve the Speed. Working on all the latest technologies like HTML5, CSS3, etc. Tackled various issues related browser compatibility to accommodate these advanced and fast technologies Done several projects on Jsp And Spring Develop the customer experience treatment for the identified customer segments using servlets tool Experience in designing, developing multi-tier application using J2EE technologies Servlets, JSP, Java Beans, JNDI, JDBC, Ant, Log4J, XML DOM, Web Services, SOAP, Restful, DOJO using J2EE design patterns. Experience in designing, developing in XML DOM, Web Services, SOAP, Restful, DOJO using J2EE Produced high quality reports using itext libraries inside of a java restful web service to respond to customer requests Expert and fine-tuning in EMC Documentum Experience in using Core Technologies Java, Servlets, JSP, Custom tags, JavaBeans, JavaScript, Struts, Spring Boot, Ajax and Google Web Toolkit (GWT) Train, guide, and assist development groups in use of JIRA/Confluence as well as plugins such as AGILE, Subversion, Utilities, and reporting capabilities, etc Designed and developed application screens using Swing, HTML, JSP, Node.JS, Angular.JS, and CSS. Experience developing complex reports using drill-through reports, prompts, dashboards, master-detail, burst-reports, dynamic filtering in Cognos. Involved in user interface development using Jasper report. ENVIRONMENT: JQuery, Java, J2EE, Spring, IBatis, Struts, JSF, EJB, MYSQL, Toad, SQL Server, DB2, APACHE AXIS2, WSDL, Netbeans, JBoss, Mercurial, Clearcase, Selenium, Water fall model, UML, JSP & SERVLET, ANT, Xml, EMC Documentum, GWT (Google Web Toolkit), JIRA, SWING, Cognos, ILOG, Oracle Application Development Framework (Oracle ADF) . Oracle Business Process Management (Oracle BPM), IBM MQ Series, Apache Tomcat, Linux, Unix, Ruby, WordPress, Drupal, z, ASP, C, C++, Mainframe, COBOL, PL/I, JCL, SQL, SAS VB and ASP UI/UX Developer Bank of America - Dallas, TX July 2013 to December 2014 Responsibilities Strong and creative UI/UX Developer with over 8 years of development

experience in front- end development using HTML/HTML5, XHTML, DHTML, CSS/CSS3, JavaScript, XML and JavaScript frameworks such as jQuery, AJAX, JSON and Bootstrap. Experience on working with CSS Background, CSS Layouts, CSS positioning, CSS text, CSS border, CSS margin, CSS padding, CSS table, Pseudo classes, Pseudo elements and CSS behaviors in CSS. Extensive experience in web design using CSS3, Bootstrap, Adobe Illustrator, Adobe Photoshop, Dreamweaver. Interactive UI Developer in User Interface Design, Software Design, Development, Implementation, Testing, and Documentation of both Web & Client Server Applications. Implemented various screens for the front end using React JS and used various predefined components from NPM (Node Package Manager) library. Experience in Redux architecture and implemented SPA's with React Router. Designed and developed large web based enterprise solutions with emphasis on use of HTML, XML, XHTML, CSS, various jQuery plug-ins and OO JavaScript framework. Designed and Developed Web applications using CSS pre-processors like LESS, SASS/SCSS and excellent experience in CSS methodologies like OOCSS, BEM and SMACSS. Developed web applications quickly and effectively using ReactJS, AngularJS, jQuery, HTML5, CSS3, Responsive Web Design, .NET Frameworks, Ionic, Twitter Bootstrap and experience in making web page's cross browser compatible. JavaScript expertise in both client and server side scripting languages like jQuery, AngularJS, ReactJS, RequireJS, Ember, NodeJS. Experience in developing rich internet applications and various UI/UX widgets using jQuery, ReactJS and AngularJS for Web Application and Mobile Application. Experience in developing NodeJS applications using MVC frameworks and installation of client side dependencies using Bower. Experience in Graphic and User Experience Design and Transforming Web/Graphic Designs using HTML, CSS, aesthetic development, Graphic development, JavaScript, Mustache template and Bootstrap. Environments: Java, Jsp, Servlets, Ejb, Html, Javascript, Ajax, Log4j, Xml, Dom, Editplus, Mule, Jboss ENVIRONMENT: Java, J2ee, Sybase, Bea Weblogic Server, Jstl, Sql Server, Struts, Frame Work, Servlets, Jsp, Ejb, Wincvs, Javabeans, Eclipse, Uml, Windows Xp/Linux. Java, J2EE, Spring, IBatis, Struts, JSF, EJB, MYSQL, Toad, SQL Server, DB2, APACHE AXIS2, WSDL, Netbeans, JBoss, Mercurial, Clearcase, Selenium, Water fall model, UML, JSP &

SERVLET, ANT, Xml HTML5 developer Humana - Boston, MA July 2011 to December 2013

Responsibilities: Used CSS3 to develop Rich UI Components such as Accordions and Modal Windows using pure HTML 5 and CSS3. Integrate the dynamic pages with Angular and Ionic to make the pages dynamic. Used Bootstrap, angular.js, node.js for developing modules on front-end. Implemented RWD in the application to make it compatible for tablets and Desktop of different screen sizes. Used NPM and Bower for dependency management. Used Jenkins to automate the build process from JIRA. Managed the version control for the deliverables by streamlining and re-basing the development streams of the SVN and GIT. Tracking & updating project development status and issues in JIRA. Implementing the client side functionality as per requirements. Optimized the page load time for the pages that had heavy traffic and improvised those pages using CSS. Involved in Agile process, monthly Sprints, and daily Scrums to discuss the development of the application. Used WinCVS as version Control system. Suggested ER models and changes in the table structures. Modified SQL, PL/SQL procedures and triggers to obtain optimize output. Involved in separation of components and deploying in different servers and balancing the load among each Server. Solved performance issues and brought optimal output from the available resources. Standard Tag Library (JSTL) Maintained Struts architecture throughout the application. Developed the bean classes for better data exchange between the MVC layers. Successfully differentiated presentation from code. Used multi threading and socket programming. Deployed the application on WebLogic Application Server. Created connection pools and data sources. Modified JavaScript to read client side activities (events) and data and event validations. Involved in developing the UI pages using HTML, DHTML, CSS, JavaScript, JSON, jQuery, Ajax. Followed the Agile and Scrum development methodologies. Integrated the Java code (API) in JSP Pages. Used jQuery core library functions for the logical implementation part at client side for all the application. Debug the application using Firebug to traverse the documents and manipulated the Nodes using DOM and DOM Functions using Firefox and IE Developer Tool bar for IE. Involved in developing HTML and JavaScript for client side presentation and, data validation on the client side with in the forms. Involved in writing SQL Queries, Stored

Procedures. ENVIRONMENT: Java, J2ee, Sybase, Bea Weblogic Server, Jstl, Sql Server, Struts, Frame Work, Servlets, Jsp, Ejb, Wincvs, Javabeans, Eclipse, Uml, Windows Xp/Linux. JavaScript Developer Costco - Austin, TX May 2009 to June 2011 Responsibilities: Experience with JavaScript MVC Framework such as Angular JS 2.0. Hands on Web kit, Blink, Dojo Toolkit. Experience in developing and deploying applications using Tomcat and Eclipse, IntelliJ. Sound knowledge in Version control systems like CVS, Subversion, Clear Case, VSS. Experience in Struts MVC and spring, informatica frame works. Strong experience in implementation of Hibernate into frameworks like Struts, spring. Develop the User Interface Screens for presentation using Java, JSP, HTML, Java Script and Ajax. Worked with MVVM pattern and developed view-models using typescript. Hands on Node.js, Express.js, Backbone.js, D3.js and responsive web designs. Worked with from front to end software Development Engineering (SDE) process. Experience in using Design Patterns like MVC, Data Access Object (DAO), Singleton, Business Delegate, Service Locator and Session Facade. Proficiency in Database Programming using SQL Server, MySQL, Oracle and Casandra. Expertise in object modeling and Object-Oriented design methodologies (UML) . Experience with UML diagrams like Class, Object, Use Case, State, Activity diagrams. Hands on working with Windows XP and Windows 7 operating system. Worked on Unit test by Test -Driven Development (TDD) with JavaScript. Experience using popular IDE's like Eclipse, Komodo Edit, Sublime Text and Notepad++. Worked with off-shore team and back- end onshore team. Worked with Amazon Web services to build secure, reliable, and scalable JavaScript applications. Gathered system requirements for the application and worked with the business team to review the requirements, and went through the Software Requirement Specification document and Architecture document. Using advanced level of JS to build the pages for heavy DOM manipulation, dynamic display of data taking advantage of two-way binding, dirty checking. Developed application pages using HTML, CSS, Bootstrap, RWD, JavaScript and jQuery. Extensively developed pages using Bootstrap (RWD) and CSS box model. Developed CSS3 style sheets to give gradient effects. Developed page layouts, navigation and icons. Applied industry best practices and standards when project requirements were lagging. Created Images, Logos and

Icons that are used across the web pages using Adobe Flash and Photoshop. ENVIRONMENT: HTML5, XML, CSS3, Java Script JavaScript libraries jQuery, Angular.js, D3.js, Node.js, Express.js, Prototype.js, and Sencha Javascript Toolkit Dojo Toolkit Web Services Apache Tomcat, Web Logic. Education Master of Science in Computer Science Stanford University Skills AJAX (10+ years), BOOTSTRAP (10+ years), CSS (10+ years), JAVA (10+ years), JAVASCRIPT (10+ years) Additional Information TECHNICAL SKILLS: UI Technologies: Angular.js, Backbone.js, Node.js, Bootstrap, HTML, CSS, JQuery, Ajax, Sencha Extjs, Javascript, JSP Operating Systems: UNIX, AIX, Solaris, Win 95/NT/2000/XP, LINUX Technologies: J2EE, JDBC, JSF, Servlets, JSP, Java Beans, RMI, EJB, JNDI, JMS, XML, XSL/XSLT, HTML, DHTML, and JavaScript, Hibernate. Databases: Oracle, DB2 and SQL Server 2000/2005
