

Junior Software Developer Junior Software Developer Albuquerque, NM Work Experience Junior Software Developer 2018 to Present Attended CNM's Ingenuity DeepDive Bootcamp. An immerse and innovative program to get started into the tech industry. Here I got to work in teams to achieve many goals and see how efficiently teams can work together and finish the task effectively. I also learned how to implement the Java Language to build applications utilizing IDE's, Android Studio and multiple other technical tools. Sales Telecommunication Companies November 2013 to December 2018 Sales and customer-oriented environment, as lead sales I met and exceeded expectations to reach quotas by working with integrity and professionalism. Worked very closely troubleshooting all the latest tech devices and gadgets, this is where I decided to change paths and look more into the ever evolving world of technology.
