

SQL Server 'DBA SQL /DEV SQL Server 'DBA SQL /DEV SQL Server 'DBA SQL /DEV Pine Lake,  
GA Work Experience SQL Server 'DBA SQL /DEV FIS Co - Jacksonville, FL March 2016 to July  
2019 \* Ability to lead and manage Onshore/Offshore teams with assessments, migrations, and have  
clear understanding on project Scope managements \* Experience in MSSQL 2008, 2012, 2014,  
2016, and 2017. \* Good experience on Windows Roles (like AD, DNS, DHCP, SP, WSUS etc., \*  
Experience with Planning and executing Application and server migrations from assessment till  
migrations \* Knowledge of Oracle, MySQL, and MS SQL Server \* Experience in maintaining  
Teradata applications and database environment on Teradata version 16 \* MS SQL Server  
experience in MS Azure & Amazon AWS \* Working knowledge in Integration Services(SSIS),  
Reporting Services(SSRS) and Clustering \* Provide consultation on SQL Server Database issues  
to other teams \* Conduct in-depth analysis on Hum device logs, identify gaps and issues, and make  
recommendations, including discovering new approaches. \* Provide Database Administration and  
support of SQL Server 2005, 2008r2, 2012, 2014 and 2016 \* Knowledge and experience with  
capacity planning as it pertains to databases. \* Perform database health checks using SQL profiler,  
performance monitor, performance counters, and DBCC command \* Experience with performance  
testing and scaling \* Experience in troubleshooting and resolving database integrity issues,  
performance issues, blocking and deadlocking issues, replication issues, connectivity issues,  
security issues etc \* Developed, tested, and maintained a BACKUP and recovery process to ensure  
proper system continuity in the case of an unforeseen event \* Experience with MySQL, or NoSQL  
database \* Experience with Azure Cloud and/or Amazon Web Services ( EC2, VPCs. S3, Route53)  
\* Support database projects from inception to production deployment \* Analyze and optimize server  
and application performance based on queries, sessions, servers and storage systems \*  
Experience in creating reports and dashboards with Tableau \* Experience in a database  
administration tasks in a cloud environment for multiple database platforms including AWS RDS,  
Azure SQL, Azure DW, etc. \* Multi load-- used to create and maintain Teradata Databases. \*  
Automated unit test suite helps find the problems at an earlier stage and solve them \* Perform SQL  
Database administration including software installations/configurations. \* Script creation and

maintenance of database infrastructure in cloud hosted environments \* Responsible for all technical and operational activities associated with the DBA function(s) in a HIGH-AVAILABILITY and complex RDBMS environment.. Managed all aspects of database systems analysis including design, development, installation, and maintenance. \* Made changes to production databases, such as creating new accounts, scheduling jobs, password changes, and modifications to server configurations. \* Installed database applications on servers and develop installation procedures for client installations to be performed by the desktop support staff as requested or required \* Experience in Identifying, troubleshooting and resolving database issues in close collaboration with fellow IT staff and business users \* Experience with Teradata RDBMS at both physical and logical levels. \* Supported cloud hosted databases and migrations of on premise databases to cloud hosted databases \* Extensive experience with VMWare and SQL Server virtualized databases \* Responsibilities: Implement backup and recovery procedures for databases and test regularly in conjunction with Operations \* Technologies: TERADATA strategies in SQL SERVER2008/2008R2 2012, 2014,2016 environments SQL Server DBA ALFA INSURANCE CO - Brentwood, TN August 2014 to February 2016 \* Managed all aspects of database systems analysis including design, development, installation, and maintenance. \* Experience on SQL Instance & SQL DB Analyzer and configuration \* Wrote complex relational database queries and query optimization for very large datasets. \* Experience with high availability and disaster recovery solutions with SQL Server failover clustering, database snapshot, Always-On, log shipping and database mirroring \* Experience in SQL database performance tuning, query optimization using Performance Monitor, DMVs and other related monitoring and troubleshooting tools \* Experience in database performance tuning, using tuning methodology, including activity monitor, query plans, performance views, trace files, and other SQL Server tools \* Experience with MongoDB, used to store data for very high performance applications \* Experience with identity management, for identifying, authenticating and authorizing individuals or groups of people to have access to applications, systems or networks \* Experience with identity management, to ensure that only authenticated users are granted access to the specific applications, systems or IT environments for which they are

authorized

- \* Experience in writing T-SQL, including complex stored procedures, functions, views, and triggers
- \* Made changes to production databases, such as creating new accounts, scheduling jobs, password changes, and modifications to server configurations.
- \* Worked as a team member on intermediate to large projects
- \* Good knowledge and understanding of network and storage technologies (Hitachi/EMC/ Cisco)
- \* Monitored server activities, I/O, memory usage using system monitor/PROFILER to determine the cause of database/application slowness. Established data and user security policies.
- \* Maintained and optimized Company's transactional database via proper INDEX usage, de-fragmentation, and statistics updates, etc. Analyzed future disk space requirements, and usage to project hardware upgrade needs.
- \* Designed, developed and troubleshooting SSIS packages that implement complex ETL processes.
- \* Implemented and enforced appropriate security measures for the database.
- \* Designed and developed ETL solutions as well as debugging, monitoring and troubleshooting ETL solutions
- \* Migration and upgrade from SQL Server 2008 to SQL Server 2012, 2014, 2016
- \* Deployed of SQL Server SSIS packages, SSRS reports, and T-SQL code to QA and production environments.
- \* Tools/ Platform: SQL Server 2008, 2008R2, 2012, 2014, 2016 Active/Active and Active/ Passive cluster, Database mirroring, Database mail, DTS, SSIS, SSRS, Backup/Restore, DR plans, Cognos reporting Services, Always On Availability and with MS EXCEL

SQL Server Database Administrator /Consultant IBM Co - Atlanta, GA May 2011 to July 2014

- \* Developed and maintained ETL scripts for efficiently loading and extracting data from the database when necessary
- \* Experience with MongoDB, used to store data for very high performance applications
- \* Experience implementing data partitioning to improve performance
- \* Developed DTS/SSIS packages to perform ETL operations from various data sources.
- \* Performed and monitored all database backups and restore database in response to minor and/or major database failures.
- \* Experience providing recommendations, best practices, and guidance to improve customer infrastructure
- \* Experience in configuring MS SQL Server database, reporting services, analysis services and integration services in a Windows environment
- \* Implemented and enforced appropriate security measures for the database.
- \* Designed and developed ETL solutions as well as debugging, monitoring and troubleshooting ETL solutions
- \*

Developed, tested, and maintained a backup and recovery process to ensure proper system continuity in the case of an unforeseen event. \* Responsible for all technical and operational activities associated with the DBA function(s) in a high-availability and complex RDBMS environments \* Managed all aspects of database systems analysis including design, development, installation, and maintenance. \* Experience with Microsoft SQL Server database mirroring, log shipping and replication. \* Experience in SQL Server, Windows performance tuning and optimization in 2008R2, 2012,2014,2016. \* Proactively monitored, identified, isolated and resolved server problems to avoid impact on the business. \* Worked with IT Project team to develop database solutions to business requirements \* Experience with implementation of backup and TERADATA strategies in SQL SERVER 2008/2008R2 2012,2014,2016 environments \* Maintained and optimized Company's transactional database via proper INDEX usage, de-fragmentation, and statistics updates, etc. Analyzed future disk space requirements, and usage to project hardware upgrade needs. \* Managed night job data processing for ongoing success- troubleshoot and rectify any production related issues. IT staff 2012 to 2014 \* Experience in SQL Server and Windows performance tuning and optimization in 2008R2, 2012, 2014 \* Experience with MongoDB and Sybase, used to store data for very high performance applications \* Update and maintain job knowledge by participating in education, reading detail oriented publications, maintaining personal networks, share knowledge with other IT staff \* Ability to install and configure SQL Server 2008, 2008r2, 2012, 2014 and 2016 \* Automation: Indexing, Database Performance issues, Database Tuning, Isolate slow-running queries and Identify the cause of slow-running queries. \* Experience with Microsoft SQL Server 2014 and 2016, T-SQL language, and MS SQL Security \* Experience with PowerShell SQL-Server Database Administrator Wachovia Bank - Atlanta, GA February 2004 to February 2008 \* Ensured that database solutions for application systems are developed in a way that complies with architectural standards and established methodologies and practices. \* Experience in security concepts as they relate to SQL Server \* Experience with transactional and snapshot replication \* Installed, configured, and administer Oracle and Microsoft SQL database instances. \* The ability to OPTIMIZE stored procedures, performance tuning and index tuning using

index tuning wizards and SQL Profiler. \* Experience in T-SQL writing stored procedures, triggers and functions \* Experience with SQL Server transparent data encryption (TDE) \* Analyze and optimize server and application performance based on queries, sessions, servers and storage system \* Supported project teams; time management skills, comfort with bank processes, judgment regarding when to escalate \* Participated in Disaster Recovery exercises (if available remotely). \* Tools/ Platform: SQL Server 2003, 2005, 2008, 2008R2, Active/Active and Active/ Passive cluster. \* T-SQL & ANSI SQL and MS EXCEL Education Master of Public Health in Public Health Tulane University - New Orleans, LA Bachelor of Science in Business Administration Miles College - Birmingham, AL Skills Database administration, Database, Database design, Sql server, Sql server 2000, Sql server 2005, Sql server 2008, Sql, Sql queries, Stored procedures, Clustering, Data collection, T-sql, Active directory, Dhcp, Terminal services, Dns, Scripting, Systems development, Disaster recovery
