

Network Administrator Network Administrator Bloomfield, IA Authorized to work in the US for any employer Work Experience Network Administrator Mercy Medical Center - Centerville, IA April 2013 to Present I currently work as one of the Network Administrators for CHI and Mercy Medical Center in Centerville, IA. My day to day activities include answering users questions and helping them with any problems in the facility. Since this is a medical facility, I have been working with users to increase the security and integrity of the system and the information that is help on our network. Lately we have been working towards updating the entire network to windows 7 and windows 8.1 from windows XP. This includes testing different software for compatibility with the new system and making sure that all software and hardware are functioning to standards with the network. Cisco Network Engineer Aston Technologies Inc. - Minneapolis, MN January 2012 to March 2013 I worked as a subcontractor on Cisco technology for IPT (IP Telephony). These products include CUCM and Cisco VGs. During my day to day activites I worked everything from break/fix issues to design of network infrastructure. The latest client that I helped with is State Farm in Bloomington, IL. With State Farm, my primary role was to assist in the design of their corporate network. This include load balancing and right sizing the network trunks to allow for optimal cost and efficiency. Education AAS in Computer Networks and Security Indian Hills - Ottumwa, IA 2007 to 2010 Skills Cisco (3 years), Network Administration (4 years), Networking (4 years), Networking (4 years), Cable Managment (4 years), Cable Managment (4 years)
