

ETL Developer / Database Administrator ETL Developer / Database Administrator ETL Developer / Database Administrator To enrich my experience as Database Administrator/Developer by working in a challenging and task Oriented environment where my skills are optimally utilized.. Work Experience ETL Developer / Database Administrator Lighthouse List Company - Pompano Beach, FL March 2013 to October 2013 Pompano Beach FL ETL Developer / Database Administrator Used ETL (SSIS) to develop jobs for extracting, cleaning, transforming and loading data into data warehouse. Expertise in using user and system variables, expressions and functions for the SSIS Packages. Applied audit method for source files in SSIS package. Extensively used SSIS transformations such as Lookup, Derived column, Data conversion, Aggregate, Conditional split, SQL task, Script task and Send Mail task etc. Created child package and established relationship between child and parent packages Monitored, Scheduled the SSIS packages and find the errors when job failed by using the SQL Server Agent. Created parameterized reports, Drill down, tabular and matrix reports using SSRS Designed Developed and tested database Back up Summary Report for all Databases with the help of system tables by using SSRS Created complex Stored Procedures using dynamic T-SQL. To Determine the Fill Rate Summary Report for each table created dynamic T-SQL stored procedure which accepts the table name and schema name Created databases and schema objects including tables, indexes and applied constraints Used Execution Plan, SQL Profiler and Database Engine Tuning Advisor to optimize queries and enhance the performance of databases Reporting Analyst/ Database Administrator/Developer PUBLIC MOBILE Inc - Toronto, ON October 2010 to February 2013 Strong experience in Database Administration in SQL Server. Resolved the troubleshooting and database integrity issues, performance issues, blocking and deadlocking issues, replication issues, log shipping issues, connectivity issues, security issues etc. Tuned Performance, Query Optimization, using Performance Monitor, SQL Profiler and other related monitoring and troubleshooting tools. Detect and troubleshoot SQL Server related CPU, memory, I/O, disk space and other resource contention. Creation of indexes, index management, and integrity checks, configuration, patching and updating statistics. Maintained the database security and monitoring user access to the database

Developed ETL jobs to bring the information from the data warehouse to Marketing database (data mart) By using SSIS. Designed and developed the weekly and daily operational reports By using SSRS and SSIS Tools. Developed ad-hoc SQL queries to assist business users Wrote complex SPs in T-SQL Developed a solution based on the requirements to feed data to CdRator Billing System for sending SMS messages to customers for marketing purposes Designed and built the database to send customer information to outbound call center for calling purposes and getting feedback from customers by using SSIS Tool

Public Cash Services Project: Designed and developed this project from one end to the other end that includes building the database from scratch and provide analytical reports to users. Developed and maintained daily/weekly reports by using web interface of MicroStrategy Designed and Developed a parsing process to parse the raw data based on the mapping rules and loaded the data into the system

Database Administrator
MEGATECH INTERNATIONAL - Fort Lauderdale, FL June 2010 to August 2010 Installed and upgraded the Sql Server Involved in the analysis and design Created Database and Database Objects like Tables, Stored Procedures, Views, Triggers, Rules, Defaults, user defined data types and function. Defined relationships between tables and enforced the referential integrity constraints and created clustered and non clustered index Responsible for general database administration and query performance tuning. Backup recovery scheduled and backup scripts. Maintained the database security and monitoring user access to the database Created the physical and logical database design by using Erwin.

Database Developer/ Administrator
Heaven Fresh Inc - Toronto, ON June 2008 to December 2009 Maintained, Monitored and tuned SQL Server Database Assisted users/developers with their day to day tasks and resolved problems as they occur Assisted end users in writing optimized SQL queries Assisted in Data Migration /Movement Maintained and developed complex MS T-SQL stored procedures Responsible for database monitoring and tuning of database and application SQL Provided query performance monitoring and tuning recommendations Provided change management and documentation for database changes Develop and execute appropriate Data Definition Language (DDL) to support projects Review and approval for application based scripts, utilities, stored procedures, functions,

and triggers Provided on-call support for database problems and off hour's maintenance

Responsible for maintaining database security and monitoring user access to the database

Worked with application developers and assisted them with database related issues and inquiries

Education Bachelors in Information Technology York University - Toronto, ON 2010 Additional Information CORE COMPETENCIES: Expertise in SQL Server Database Administration

Expertise in SQL Server Database Development Expertise in using the Microsoft SQL Business Intelligence Development Studio SUMMARY OF SKILLS: BI Tools: SSRS, MicroStrategy ETL Tools: SSIS Languages: SQL, Java, HTML, JavaScript Database Systems: SQL Server 2000/2005/2008, Oracle, DB2 UDB, MS Access, Teradata Operating Systems: Windows, UNIX (AIX, Sun Solaris), Linux (Red Hat) MS Office Tools: Word, Power Point, Outlook, Excel 5 plus years of experience in SQL Server Database Administration and Development Strong skill in using the Microsoft SQL Business Intelligence Development Studio Experienced in SSAS, SSIS and SSRS BI Tools Experienced in Database Maintenance and Performance Tuning of large scale databases Strong understanding of Relational Database Management Systems Experienced in SQL Server database administration like performance monitoring & tuning, Database design & analysis, Maintaining current database statistics and organization of data in tables, Database Security and Backup and Recovery procedures Experienced with logical and physical design of database DTS and ETL design and development experience Experience with Disaster Recovery and High Availability SQL Server Replication and Cluster experience Experience with UNIX, Linux and Windows operating system environment Expertise with SQL tuning and SQL development Self-Motivated and Results-Oriented Driver Strong sense of Task and Time Management & Team Playing Excellent written and oral communication skills and proven problem-solving skills Extremely dependable in completing projects accurately and on time

Equally effective working in self-management projects and as a member of a team
