

Sr.SQL Server DBA Sr.SQL Server DBA Sr.SQL Server DBA - NCCI Holdings Boca Raton, FL
 8+experience Year database by running DBCC statements and rebuilding\reorganizing indexes.
 Monitored the performance of Database Backup and other jobs in the maintenance plan Restoration
 and Point in-Time Recovery and optimized as needed. Monitored Server Activity, Error Log, space
 usage, and solving problem as needed Authorized to work in the US for any employer Work
 Experience Sr.SQL Server DBA NCCI Holdings - Boca Raton, FL April 2018 to Present
 Responsibilities: Provide Production Support for MS SQL Server Databases in High Availabilities
 Perform day-to-day administration on SQL Server environments Diagnose & troubleshoot issues,
 monitored the performance of the database and optimized to run more efficiently. Manage
 database Capacity growth, refresh data from production to lower environment Monitored
 databases, migrate SQ Server from SQL Support SSIS, SSRS, Data warehousing Manage and
 implement production release Lead the Disaster Recovery Used SSRS to generate reports by
 querying from database Generated many reports by querying them from SQL Database as per the
 business requirements. Install SQL Server Fail-over Cluster and Migrate SQL Server from SQL
 Set up and configure database Mirroring, Log shipping, support SSRS, SSAS Automate
 maintenance jobs, install services patching Work well in a team with excellent communication
 skills Identify problems, find root cause and perform tuning to ensure application performance
 Manage database Capacity growth, write stored procedures, triggers Maintain & manage
 Database security, install monitor tools on the Server Import and export data in Oracle Data Pump
 utility Manage User security access in SQL server and backup database SQL DBA Cognizant -
 Teaneck, NJ September 2016 to March 2018 Responsibilities: Installed, Configured, and
 Administered SQL Server 2012/2008/2005. Backed up databases using Full, Differential and
 Transactional log backup methods. Restored Database from database backups and file backups.
 Experienced with Point-in-Time Recovery. Maintained logical consistency of the database by
 running DBCC statements and rebuilding\reorganizing indexes. Monitored the performance of
 Database Backup and other jobs in the maintenance plan Restoration and Point in-Time Recovery
 and optimized as needed. Monitored Server Activity, Error Log, space usage, and solving problem

as needed Maintained server level, database level and object level security best practices by creating logins and users, configuring permissions and assigning different roles to users. Configured Database Mail and SQL Server Agent. Created user access, monitored and optimized the performance of the database. Created SQL Server Event, Maintenance Plans and Performance Condition Alerts. Scheduled jobs to automate different database related activities including Backup, Index Optimization, Monitored Database health, Disk space and Backup verification. Set up Merge, Transactional and Snapshot Replication on remote server. Configured and administered Fail-Over Clustering, Transactional Log shipping, Replication and Database Mirroring using SQL Server 2012, 2008, and 2005. Performed database integrity checks using DBCC utilities and maintenance plan configuration wizard. Implemented troubleshooting of SQL Server performance issues using SQL Tools, execution plans, Trace, statistics, index tuning wizard. Performed database migration and upgrade from SQL Server 2005 and 2008 to 2012. Installed and applied Service Packs (SP) on SQL Server 2005, 2008 and 2012 using SCCM. Deployed window server patches on Window server 2012, 2008 using big fix Installed, configured, and administered MS SQL Server 2005 and 2008 Integration Services (SSIS) and Reporting Services (SSRS). Performed Export & Import of databases from/to Flat file, excel Access, Oracle and MySQL to/from SQL Server Database using DTS, SSIS, and BCP. Generated reports by querying from SQL database by using a variety of query design tools such as text-based query designer, report model designer and MDX designer to generate report Responsible for backing up and restoring databases Performed writing T-SQL, Trigger and Stored Procedures. Supported remote production and development servers, clustered/non clustered environment. Performed DBMS maintenance, backup and recovery. Performance tuning, Index optimize, maintaining and troubleshooting database problems Posses good analytical problem-solving skills, excellent communication and self-driven skills to get the job done SQL Database Administrator CaseNet - Waltham, MA September 2014 to August 2016 Responsibilities: Develop and optimize T-SQL code, including database scripts, triggers and stored procedures for multiple TruCare applications Develop Microsoft SQL Server SSIS packages to implement ETL requirements Data modeling and

data architecture Database performance monitoring, SQL tuning and analysis, troubleshooting, and data concurrency analysis Various database administration tasks in development and test environments Develop, enforce and maintain database standards

SQL DBA Speedway LLC - Enon, OH June 2012 to August 2014 Responsibilities: Work closely with project managers, business analysts, business clients and other SQL team members to define requirements, design, estimate, code, test, certify, pilot, and roll-out requested changes. Provide support to Speedway Departments to troubleshoot and resolve production issues. Provide 24 / 7 on-call support, this responsibility is rotated and shared Maintain development test environment Work with deployment team to build and test software deployment package for certification environment and live stores

SQL DBA Unisys - Blue Bell, PA February 2010 to May 2012 Responsibilities

High-level technical resolution for incidents received from phone calls, emails or automated ticketing system during specific shifts Evaluate Root Cause analysis, looking for permanent fix, and preventive steps Automation View (preferably script ability - PowerShell/shell script) Provide client advisory on Database Technology, Architecture and best practices Install, patch update and Upgrade MSSQL & ORACLE Databases Learn new versions and provide guidance on migrations and new Standards Work closely with IT project managers, database programmers and multimedia programmers Developing, managing and testing Database backup and recovery plan

Writing Database documentation, including Data Standards, procedures and definitions

Troubleshooting Oracle issues Perform Database performance tuning and capacity planning

Expertise in High Availability and Maintainability solutions for Master & Slave Cluster servers Lead and/or participate in project activities

Education Bachelor's ,,,,, Skills DATABASE, DATABASE DESIGN, SQL SERVER, SQL SERVER 2005, SQL SERVER 2008
