

SQL Server Database Administrator SQL Server Database Administrator Staten Island, NY I am detail-oriented, hard-working individual with over three years of experience working with SQL Server databases. Seeking a SQL Server Database Administrator position; to work with an organization which will utilize my competencies to achieve company goals and objectives and to enhance my overall continuous growth and development as an individual. I have worked in multiple geographical areas with high degree of initiative, numerical ability with strong organizational and analytical skills. I have excellent communication skills, Excellent Team player, flexible, fast Learner, possesses characteristics of self-motivation and a "can do" attitude. I am an experienced SQL Database Professional with over 3 years experience in Database administration. Work Experience SQL Server Database Administrator Bank of America - Pennington, NJ March 2017 to Present Duties and Responsibilities: ? Installed and configured MS SQL Server on Production, Test and Development boxes. ? Involved in capacity planning, data modeling and logical/physical database Design. ? Involved in creating Schemas, Logins, Tables, Clustered and Non-Clustered Indexes, Views, Functions and Stored Procedures. ? Undertook General Database Administration, Query Performance tuning, Optimization of procedures, created necessary indexes and validated some of the existing schema. ? Created the Jobs using maintenance Plans for Full, Differential and transactional log backups. ? Security set up including creating logins, database roles, DDL, Schema Design, Applying Data integrity rules, and wrote many DML scripts for hot fixes. ? Worked with SQL server Profiler to generate traces to identify performance issues. ? Created and Maintained Database Maintenance Plans for backup and also performed Database restores. ? Creating, maintaining the users, roles and granting privileges. ? Used SSIS and SQL Data Tools to support deployment and business solutions. ? Provided 24/7 on call support and fixed the production issues resolving tickets in problem management tool (Remedy). ? Backup & recovery and performance monitoring. ? Responsible for disaster recovery planning for SQL Servers. ? Performed database enhancement and modification as per the requirements in SQL Server. ? Prepared daily report on the job failures, backup failures and disk space. ? Extensively used Database Performance Monitoring tools for performance tuning. ? Designed and implemented database maintenance plan.

? Used Index tuning wizard and rebuilding indexes for faster Query Performance. ? Assisted in capacity planning, space management and data maintenance activities for database system in SQL Server. ? Involved in resolving deadlock issues and performance issues. Database Tools: SQL profiler, SQL Query Analyzer, Index Analyzer, SSIS, SSRS, SSAS, DTA, Upgrade Wizard, Bulk Insert and BCP, SQL Server Management Studio. SQL Server DBA Texas INC - Fort Worth, TX December 2016 to February 2017 Responsibilities: ? Configured SQL Server installations to meet defined best practices. ? Worked on Client/Server tools like SQL Server Enterprise Manager and Query Analyzer to Administer SQL Server. ? Created Database Maintenance Planner for the Performance of SQL Server, which covers Database Integrity Checks, Update Database Statistics and Re-indexing ? Backing up master & system databases and restoring them when necessary. Supported production environment. ? Responsible for data analysis to determine trends and outliers impacting results ? Setup Snapshot, Transactional Replication between Servers. Troubleshoot monitor Publishers, Distributors, Subscribers ? Analyzed long running slow queries and tune the same to optimize application and system performance. ? Responsible for monitoring and making recommendations for performance improvement in hosted databases. This involved index creation, index removal, index modification, file group modifications, and adding scheduled jobs to re-index and update statistics in databases. ? Involved in Creation of logins, Users as per Security standards and groups, roles, jobs, alerts and sending mail confirmation upon tasks. ? Implemented and maintained database security according to client security requirements. ? Monitored SQL Server error logs and windows event viewer for software and hardware errors. ? Worked with application team to implement, test, and enhance stored procedures, views, functions and other T-SQL scripts. ? Troubleshoot the performance issues for slowness in the hardware and also in the SQL by using profiler and execution plans. ? Worked with application team to implement, test, and enhance stored procedures, views, functions and other T-SQL scripts. ? Migrated database objects from development/test environments to production. Database Engine Tuning Advisor Maintenance and Administration 2012 to 2012 of SQL Server 2014/2012/2008r2/2005. Experience in implementing backup and restore, ensuring proper recovery and recovery models.

SQL Server database physical model creation and implementation. Setting up and administering SQL Server Database Security environments using Profiles, database Privileges and Roles. Used SSIS and SQL Data Tools to support deployment and business solutions. Experience in Performance monitoring using Activity Monitor, SQL Profiler, SQL Trace, and System stored procedures, DETA (Database Engine Tuning Advisor). Experience in monitoring and troubleshooting 24x7 operations. System database migrations and maintenance. Database Installation, configuration, upgrades, capacity planning, performance tuning. Experience in High Availability Solutions: Log Shipping, Database Mirroring, Failover Clustering and Replication. Experience in using Query Analyzer and Profiler to tune SQL Server databases. Good knowledge in writing SQL queries and joins using SQL Server 2012 and other tools based on the need to compare data in database. Experience in implementing SQL Server security and Object permissions like maintaining Database authentication modes, creation of users, configuring permissions and assigning roles to users. Created maintenance plans to perform index de-fragmentation, re-indexing and update the index statistics. Experience in creating Jobs, Alerts, SQL Mail Agent and scheduling DTS and SSIS Packages. Experience in implementing different types of Replication Models like Snapshot, Merge and Transactional on basis of business specification. Experience in performing integrity checks. Methods include configuring the database maintenance plan wizard and DBCC utilities. Experience in troubleshooting SQL issues by using SQL Tools, execution plans, Trace, statistics, index tuning wizard. Excellent keyboarding skills, strong PC experience in Word/Excel/PowerPoint and ability to quickly learn in house order management system ; Ability to work in an operational environment of statistics ; Good follow-up and follow-through techniques ; Ability to handle multiple tasks ; Team player with effective interpersonal skills and customer focused attitude ; Self- motivated individual willing to see all assignments to completion ; Strong organization and prioritization skills (10+ years) ; Ability to work under pressure. Education Master's in Philosophy Imo State University Skills Data migration, Database, Microsoft sql server, Sql server, Sql, Sql Db, DBA, Ssis, MYSQL, ETL
