

Oracle Database Administrator Oracle Database Administrator Oracle Database Administrator -
Ohio State Department of Taxation To be a dynamic member of a dynamic and challenging
workforce where I can put in meaningfully to the overall goal of that organization, achieving
self-fulfillment both as a professional and an individual in my chosen career (Oracle database
administrator). Authorized to work in the US for any employer Work Experience Oracle Database
Administrator Ohio State Department of Taxation - Columbus, OH September 2016 to Present
Administering 5TB+ Oracle Database. Erwin v9.5 Data modeling tools Oracle Grid and
Database 12.2 software installation MSSQL Instance Installation MS SQL Server 2014 data
migration using red gate schema compare Oracle Database Administrator Medstar Health -
Georgetown, WA June 2013 to July 2016 Install and upgrade new versions of Oracle database and
tools Oracle 12c DataGuard Apply PSU as required Manage resource sharing among
applications Implement and enforce security for Oracle databases Administer all databases
objects, including tables, clusters, indexes, views, sequences, packages and procedures
Performs database re-organizations as required to assist performance and ensure maximum uptime
of the database Oracle Connection Manager Data Partitioning Oracle OEM Lifecycle
management Design and implement 2 node RAC database on Linux Managed 11gR2 Grid
Infrastructure (ASM, Clusterware) Managed all RAC databases on ASM storage Managed RAC
databases using CRSCTL, SRVCTL and Grid Control Managed Oracle 11gR2 database using
Oracle Enterprise Manager Successfully configured and setup Oracle 11gR2 Data Guard
Managed Data Guard using Data Guard broker Troubleshoot and resolved log gap in Data Guard
Configuration Ran database backups using RMAN Responsible for applying quarterly Oracle
critical patch updates (CPU) Performed database refreshes from production to test Implemented
multiplexing control files and redo log files Used Datapump to export data from production to test
servers Creating and rebuilding indexes as necessary Performing database cloning and
duplication using RMAN and Datapump Responsible for performance tuning and system wide
optimization Evaluation and implementation of alert monitors, implementing database security
using standard/fine grain auditing Created FGA policies in PL/SQL IMPDP (Data Import),

EXPDP (Data Export) Performance Management by running Automatic Workload Repository (AWR), Automatic Database Diagnostic Management (ADDM) Provide 24x7 database support

Created knowledge base containing database structure, changes, common issues and resolutions

Other responsibilities include: ? Assisting in project planning ? Successfully developing IT project implementation plans ? Working closely with application developers in application design and testing

Projects: Oracle database upgrade from 11.0.1.3 to 12.0.1 on a RAC database Tivoli Workload Scheduler new environment development. Oracle Database Administrator MS Sqlserver 2014 to 2014 Backup using Redgate Backup tool. Deployed Oracle Unified Auditing on 12c databases Cloud control Monitoring Metric creation for Blocking session And long running queries

Database link Creation Monitoring CPU usage using TOPAS, MMON Supporting Application Databases (Datastage, PeopleSoft, DataWarehouse, Cognos, PSRM, TWS, ESB)

Troubleshooting Internal Error using ADRCI diagnostic tool Providing support to application development teams Backup and Recovery from and into SBT_Tape Performance Tuning via OEM13c using Sql Monitoring and Top Activity Oracle Storage Management Oracle Grid Configuration / deconfiguration Shell Scripting Sql Scripting Rman Database Cloning Oracle Database Backup and Recovering Using Rman Flashback Database Rac database upgrade from 11g to 12.1.0.2 Oracle Agent Installation/Troubleshooting Applied Database and Grid PSU/OneOff patches TFA Installation/Upgrade Oracle Database Creation and Database Decommissioning Oracle Clusterware Troubleshooting Oracle Rac database Renaming on AIX Rac Installation on AIX Data Refresh (IMPDP/EXPDP) ORAchk Administration EMDiag repvfy installation/Upgrade ASM Creation Oracle Cluster deconfiguration and Reconfiguration Rman/Tape backup configuration MSSQL profile creation MSSQL 2012 instance Installation Adding LUNS to ASM disk group Database Documentations AWR (Automatic Workload Repository) ADDM (Automatic Database Diag. Mon) ASH (Active Session History) ACFS CREATION TDE/Tablespace Encryption Database Security Management (Auditing/Encryption)

Configures/set-up cluster nodes on AIX/Linux Set-up interconnects Database Structural and Data migration Tunes cluster parameters for high performance Configures standby servers

TWS (Tivoli workload Scheduler) Daily job monitoring Education B.S. in Computer Science
University of Maryland - Princess Anne, MD May 2015 A.S in Computer Science Prince Georges
Community College - Largo, MD May 2012
