

Front End Developer/Adobe AEM Front End Developer/Adobe AEM Front End Developer/Adobe AEM - Intel Corp./Altera Fremont, CA I am a Senior UI Developer, specializing in coding cross/browser HTML/HTML5, CSS/CSS3, and JavaScript. Whether working for a small business or a large corporation, I can work well alone or with a large team. I get along with others easily, I am entirely self-taught, & am constantly making an effort to stay current with web technologies. I am always looking for ways to improve my work and prefer to do things right the first time. Authorized to work in the US for any employer Work Experience Front End Developer/Adobe AEM Intel Corp./Altera - San Jose, CA October 2016 to Present I work closely with UX, design and business owners on high traffic consumer facing pages within Intel.com. Since I started I have participated in two site redesigns and a system upgrade, where I had to build the site and components from the ground up. Learned how to develop UI components for Adobe AEM. Help maintain, enhance and create new components to help our users be more productive. I am the main architect of the processes used for front- end development, which includes SVG sprite maps, JavaScript bundling and trans-piling via Babel JS, JavaScript source maps and SASS/CSS preprocessing. I've had the opportunity to lead the second redesign effort which involved planning, delegating work as well as doing some of the work myself. Front End Developer Complete Genomics - Mountain View, CA July 2015 to January 2016 I worked closely with the business and UX to build a front- end interface for a genome sequencer. I helped determine JSON model needed to display the content within the application. Worked closely with design and UX Used Vanilla JS and Backbone, Require, LESS, JSON and Handlebars Front End Developer CliQr - Santa Clara, CA March 2015 to July 2015 Helping maintain/update code for a consumer facing cloud-management application.
