

Director of Digital Design Director of Digital Design McHenry, IL Authorized to work in the US for any employer Work Experience Director of Digital Design The Baha'is of the United States - Evanston, IL January 2005 to Present As Director of Digital Design, I successfully established a framework for software development at the Baha'i National Center in the United States. By creating an ideation process that incorporates stakeholder/user input combined with a healthy research effort, this framework enables the organization to make more informed strategic decisions based on data measured against primary goals and initiatives. Based on these inputs it becomes possible to abstract designs for product, designs that can be articulated into tactical plans for production. I have mentored many individuals in all phases of Digital Design ranging from research/discovery, product planning and management, visioning product UI's, building front-ends, producing micro-services/api's, site reliability engineering using cloud technologies, and management of production lifecycles.
