

Software Engineer Software Engineer Software Engineer Independence, MO Work Experience
Software Engineer Jackson County June 2019 to Present Help create and maintain applications
used by various groups within the county. Use C#, .NET, SQL, and any other technologies
necessary to help them perform their jobs. Coaching Manager University City of Independence -
Independence, MO July 2017 to Present July 2017 - Present Coaching Manager University
Technical Design/Support/Co-Owner > Coaching Manager University teaches managers how to
effectively coach their employees to create more buy in and increase productivity. > My role is to
handle the technical aspects of the business. This includes creating the content, posting it to the
web, creating the website, enrolling students, etc. Application Developer UMB Bank N.A August
2013 to July 2017 Application Developer > Worked on a variety of applications written in languages
including C# .NET, SQL, DB2, VBA, and COBOL. > C# applications including Electronic Banking
web services, HSA Enrollment website, and batch programs. > Wrote VBA macros in order to
automate previously manual processes in Excel. Some of these were ran within batch C#
applications running automatically with Zena. Some of these also involved transferring files between
the mainframe and distributed side using Cyberfusion and running those mainframe jobs
automatically using Zeke. Part of this work was done by an intern who I directed. These saved the
company approximately 30 man-hours per month. > UMB provided training in COBOL and
specifically a form called HOGAN, which is a banking version of COBOL created by CSC. UMB is
adding a web service component of HOGAN called Celeriti, which is the project I'm mainly working
on. I was able to learn a new language that they don't teach in school (COBOL) while providing
distributed experience to the mainframe team that they needed for this project. Software Engineer
Intern CITY OF INDEPENDENCE, MISSOURI June 2013 to August 2013 > Worked on the city
website. This included everything from minor rearranging of icons on the page to creating a custom
interactive small business guide/questionnaire from scratch. Education Masters of Science in
Software Engineering University of Missouri - Kansas City, MO June 2012 to July 2014 Bachelors of
Science in Physics Washington University in St. Louis August 2009 to May 2012 Skills MYSQL,
CSS, HTML 5, C# (4 years), .NET (4 years), SQL (4 years)
