Authorized to work in the US for any employer

Work Experience Senior Windows Systems Administrator Expedia Group - Chandler, AZ August 2017 to February 2019 Contract Role As member of the Hybrid Infrastructure and Core Services team, managed 18 different on-premise Active Directory domains, and several more AWS hybrid and cloud domains; including deploying OS instances and configuring Security Groups to allow network access from on-prem hosts. Responsible for server OS, for AWS, on-prem physical and on-prem virtual (VMware). Extensive work with AGPM (Advanced Group Policy Management), to configure user access, schedule patching, etc. AD schema work; cleaning up Active Directory permissions issues. Infoblox work which included adding Networks, DHCP scopes and setting Members as DHCP servers/IP helpers, and setting up custom Authoritative zones for externally hosted parent zones, to effect split horizon DNS, and managing Member HA pairs; active passive etc. Working with UltraDNS; setting up external records, zones, etc. Setting up SFTP accounts, public keys and shares, and configuring Van Dyke SFTP server; troubleshooting access issues. Managing Windows Clusters, and replacing failed nodes. Setting up ADFS relying party trusts, and varying claims rules. Powershell scripting utilizing WMI methods and properties for bulk server configuration Scripted DNS server changes, using Powershell and Shell.. Scripted changes to

multiple user and group attributes, including SFTP service accounts, groups, shares and user rights, and to monitor Services such as LDAP and DNS. Worked within an agile environment, with Bi-weekly sprints, stories, etc. Senior Windows Systems Administrator CVS Caremark - Scottsdale, AZ January 2017 to June 2017 Contract Role Assisting Windows Patching and Compliance team with night shift patching of 7000+ Windows servers; physical and virtual. Investigating vulnerabilities reported by Qualys, and handled disputes regarding validity of alerts. Senior Windows Systems Administrator Estenson Logistics - Mesa, AZ September 2016 to October 2016 Contract Role (pre-determined one-month contract) Configured and documented backup and monitoring of environment during company's change of IT management personnel. Configured and documented backup and monitoring of environment during company's change of IT management. Additionally, recommended Active Directory, vSphere and other improvements. Senior Windows Systems Administrator Swift Transportation - Tolleson, AZ October 2015 to June 2016 Contract Role Upgraded DHCP to 2012, changing to an active/standby failover solution. Set up DHCP and DNS relationship so as to enable scavenging and eliminate multiple incorrect host records. Initiated Domain Upgrade from 2008 to 2012 R2: prepared the existing schema and resolved issues preventing the upgrade. Set up and tested Active Directory Federated Services (ADFS) internally, in preparation for later external use. Set up VMWare distributed virtual switch and added the ESXi hosts to same, in order to improve efficiency in VCenter networking. Set up SCCM distribution point servers for use at remote sites. Provided general server and application support. Senior Windows Systems Administrator Discount Tire Corporate Headquarters - Scottsdale, AZ January 2015 to June 2015 Contract Role Upgraded DHCP from Windows 2008 to Windows 2012 load-balanced mode, set up and managed KMS licensing on Windows 2012, and migrated print services to 2012. Daily duties included file services management, server administration and Active Directory/Group policy management. Private Cloud Environment Manager (Windows and VMWare) General Dynamics C4S - Scottsdale, AZ October 2011 to June 2014 Contract then Full Time My work included co-managing the "High Performance Cloud Service" ("HPCS") multi-tenancy initiative, while focusing on the VMware View VDI component of the same. I managed infrastructure servers,

including SQL servers, user accounts and network resources; supporting 1500+ VMs, vSphere, vCloud Director, VMware View, ESXi hosts and 500+ end users. For our VDI initiative, I introduced User State Virtualization utilizing both Microsoft and VMware components of user profile management. Other duties were general system administration in a windows-oriented environment, and interfacing with the various cloud tenant projects. My work included migration of the virtual desktop infrastructure from Windows XP to Windows 7, migration of virtual Organizations from Lab Manager to vCloud Director and monitoring all of the virtual resources via vCenter.

Windows Systems Administrator Early Warning Services - Scottsdale, AZ November 2009 to June 2011 Full time position

At Early Warning Services, I built, maintained and monitored several hundred virtual and physical servers, using Virtual Infrastructure Manager, Group Policy, Active Directory and third party tools, including LANDesk and Zabbix. Where necessary, I designed new Group Policies and deployed scripts to improve the efficiency and security of the environment. I was part of a team responsible for moving one datacenter, and building out a second datacenter; my work included among other things, deploying multiple virtual servers from script, configuring the servers and installing software. A good deal of new hardware was involved in the above which necessitated troubleshooting various compatibility issues with VMWare, Server 2008 and Juniper networking equipment. I set up new Active Directory sites, Domain Controllers, DHCP servers, DNS servers and print servers. Daily tasks such as user share administration general troubleshooting and patching were also part of my work at Early Warning Services.
