TECHNICAL DEVELOPMENT Movie Search [ GitHub ] [ Demo ] 06/2019- present Using React, and React Bootstrap, built a web application that allows the user to search the movies of their choices. Build a simple and modern looking UI and showing the movie trailer on modal for the users. I have used open source The Movie Database API to get the data's and display in beautiful grid of cards. Hiking Tracker [ GitHub ] [ Demo ] 03/2019 Using React, MongoDB, Mongoose, Express, Node.js

and Bootstrap, built a web application that allows the user to find hiking trails based on their location. Recommended nearby hiking trails, application sends requests to two open source APIs (Google Maps API & Hiking Project Data API) and displays hike information in separate cards using React & Bootstrap. Used Express & Node.js to allow users to create accounts and log in at a later date; as a result, users are able to save favorite trails or save trails they intend to hike in the future.

Oasis [ GitHub ] [ Demo ] (Team Concept Project) 03 /2019. Design and developed UI on the Front end. Incorporated React-router and styled the website. Pair-programmed on the backend, creating API endpoints. Technologies used- React, Bootstrap, MongoDB, Mongoose, Node.js, Express.
