

Cyber Security Consultant Cyber Security Consultant Cyber Security Student Huntington, NY I am currently a student working towards my bachelor's degree in Emergency Preparedness, Homeland Security, and Cyber Security with a minor in business from the University at Albany, SUNY. I am a creative, motivated, and responsible individual with a passion for technology and innovation. I specialize in cyber risk management, digital forensics, and information security. As I continue exploring the vast world of ever-expanding technology, I plan on furthering my knowledge of cloud computing, internet of things technologies, cryptocurrencies and artificial intelligence. My interest in technology initially sparked while developing my first website in middle school. Since then I have been dedicated to expanding my knowledge of emerging trends in technology. Various internships have led me to develop a deep desire to devote my studies to both the policy and technical sides of the cyber security industry. I am driven to be in an environment where I can both advance my skills within cyber security and emergency response as well as contribute a unique perspective on issues based on my previous experiences.
