

Managed Systems Engineer Managed Systems Engineer Managed Systems Engineer Winter Park, FL I've been a computer pro since 1998. I've taken a couple of breaks along the way, but never have I strayed far from the land of IT. My five-year tenure at Amazon.com, back during their "Get Big Fast" days is a career highlight that both challenged and thrilled me. This is where my skills were broadened and sharpened. A hundred geek stories can be told from this period. Another source of learning was in Microsoft's Server Performance Lab, where I wrote batch scripts to harvest test results and update web pages to track daily trends. After a position at Real Networks, where I was instrumental in the expansion and stabilization of their encoder farm, I joined some old Amazon friends at their consultancy, BlueGecko.net. Here I expanded my knowledge of Linux and Web Hosting, while providing them the ability to offer Windows support to their clients. As a Systems Engineer with Marchex, our small IT team handled everything from everyday requests to start-to-finish company-wide projects, using multiple OSes. Projects included proof-of-concept, procurement, racking and cabling, testing and implementation. After the economic downturn that led to layoffs at Marchex, I followed my entrepreneurial spirit into online selling. I kept my IT skills sharp by taking online courses and subscribing to tech newsletters such as SANS. My second position at Real Networks made excellent use of my broad set of System Administration skills, ranging from Data Center work to Production Operations support of crucial Real Player services. My recent position at Cascadeo Corp. broadened my skills yet again, this time into Cloud Infrastructure via Amazon Web Services. I am currently studying to become an AWS Certified SysOps Administrator. I'm an IT pro and always will be. My skills and experience will make a fine contribution to any company. =====

Tony Roberson Systems Administrator / Engineer <https://www.linkedin.com/in/tonyrobertson>
lowsparker@yahoo.com 206-331-9997 Authorized to work in the US for any employer Work
Experience Managed Systems Engineer Cascadeo Corporation February 2015 to May 2015 Moved
