Experience Application Analyst/ Software Dev Leader/ Developer CHG Healthcare - Midvale, UT
2007 to 2019 Automated interface between ERP and Chase Bank for payroll, payment transfers
and cash receipts. Saving \$60k+ in annual processing costs. Key contributor of core business
functions and processes with 20+ applications supported and maintained; performed root cause
analysis of these applications including debugging java programs, scripting applications and
querying databases. Led efforts to continuously improve cross Agile team cooperation and
collaboration by imbedding support team members in the scrum teams to improve release
functionality. Reduced 1099 creation time from 3 days and 8 team members to a half day and 2
two team members. Saving \$10k in man hours. Formed new Change Request process to provide
increased visibility of impacted users and leaders of changes to our Production environment for
hardware/ software and configuration which tied into the release pipeline of the scrum teams
Excellent communication and customer skills, recognized as a champion for the customers and led
efforts in finding solutions that fit their need Skills Db2, Etl, Javascript, Json, Xml, Sql server, Mysql,
