

Software Developer Software Developer Software Developer - Strive Logistics/RedwoodLogistics
Austin, TX Over 7 years of experience in the FullStack and web application development Strong
expertise at .Net framework, ASP.Net, C#, ADO.Net, VB.Net and SQL server 2015 MVC 5, WPF
and MVVM Hands on experience on responsive frontend web development using Bootstrap,
HTML5, CSS3, Angular 2.0, Java scripts and JQuery. Hands on experience on Web services,
AJAX and WCF, AWS and WEB API. Hands on experience on Web Matrix, Crystal Report
Experience in JSON and REST API and ASP.Net API Experienced in Unit Testing for dependency
Injection. Total around 2 years' experience in rest and web API. Knowledge in Python integration
Experience on development using agile scrum methodologies and SCM tools like GIT and clear
case. Work Experience Software Developer Strive Logistics/RedwoodLogistics - Austin, TX June
2018 to Present Strive Logistics has developed LoadRunner Technologies, a Transportation
Management System (TMS) that provides a competitive advantage over other logistics providers
and acts as a disruptive force in the over \$900B domestic logistics market. Design, enhance, and
maintain Strive Internal LoadRunner Technology using C#, MVC 5, Asp.net and Sql Server 2015
Work directly with Business owners to develop solutions to complex problems Responsible for the
full life-cycle development for our proprietary software as well as customer portals for both web and
mobile Implement all new features and functions end to end, Used MSMQ for Automation
application which will update price for logistics booking Participate in the deployment of your new
features to production. Consumed rest api for another logistics company. Involved in writing c#,
code and SQL databases. Software Lead Developer Kensoc - Austin, TX August 2017 to June 2018
Working as Lead and developing websites using Asp.net, C#, MVC, WPF, CSS3, HTML5, Angular
2.0, WCF, JavaScript, and SQL server Developed Ecommerce Website using ASP.NET,
SqlServer, CSS, Angular2.0 Worked on development of online classified website using ASP. NET,
WPF and SQL Server. Developed UI with JavaScript and Angular 2.0 Converted legacy WPF UI
into modern Angular 4/Bootstrap responsive UI, to work on any browser any device and resolution
Wrote the new WCF services to be consumed by Angular 2. Ported the Legacy WPF UI into
Angular 2, boot strap responsive UI. Developed prototype for customer for project proposal

Developed quality control activities such as integration testing and code reviews. Created function specifications coded comments and other technical documentation. Collaborated with peer teams for review and analysis of system requirements. Involvement in producing demo and/or Proof of Concept for Proposals Key role in process and workflow optimization for betterment of projects Prepared project plans and completed in time duration Technical and analytical support the project manager to keep the project on time delivery Conducting code reviews for the development team Involved in UI Design and Business layer Wrote Stored Procedures, Functions, Views and Trigger in SQL Server. Did setup of project initial setup and source code management using GIT and get lab. Software Developer Kensoc - San Jose, CA September 2015 to July 2017 Worked as Software Front End Developer using Bootstrap, CSS3, JavaScript, HTML5, Angular 2.0 and ASP.Net, MVVM, WPF, C# Developed application using responsive future for mobile application Ported all WPF .NET core logic that was used by WPF, with new event model. Ported old data access layer written in ADO.NET into Entity Framework Involvement in producing demo and/or Proof of Concept for Proposals Played Key role in process and workflow optimization for betterment of projects Implemented prototype using Angular2 Prepared Technical Design Documents. Implemented Business Layer using C# code. Did setup of project initial setup and source code management using git and get lab Developed architectural design and developed architecture website using JavaScript, HTML5, CSS3, AJAX and Bootstrap Developed consulting website using HTML5, JavaScript, CSS3 and Bootstrap. Developed responsive website using HTML, Bootstrap, and CSS using Eclipse. Software Engineer/Consultant Teamware Solutions/Tata Consultancy Services - Bengaluru, Karnataka November 2009 to May 2010 Client: IMS Pharmaceuticals, USA Understood the requirements and architecture documents provided by the client. Quickly learned life science and healthcare domain. Designed, developed and enhanced various modules Implemented SQL Server 2010 and wrote queries for database backend Worked with WPF for UI Development. Worked with XAML Integrated SSIS and Workflow Developed WebAPI and integrated with application Implemented LINQ and JQuery. Involved in Unit Testing for Dependency Injection Understood requirement and designed macros and unit test

cases for the assigned project modules Participated in clients meetings and discussed all project development activities and issues at weekly meetings Software Engineer SLK software Pvt. Ltd - Bengaluru, Karnataka July 2008 to November 2009 Client: Land America Bank, USA Understood requirements and architecture documents provided by the client. Developed and enhanced various banking and finance modules for a client using C# and Visual Studio 2008. Developed ASP.NET and Silverlight frontend application. Integrated Web services with application Worked on bugs fixing in existing development and resolve few of them and also reported to responsible persons. Wrote JavaScript and worked on deployment web services. Did manual testing of my development before submitting to project source control. Discussion and weekly status update to the client. Client: Western Union, USA Understood requirements architecture different modules like loan and properties. Studied the architecture documents provided by the client. Developed ASP.NET windows application Created Crystal reports. Developed work flow management, database, and a System module. Communicating all development activities to the client at daily meetings. Software engineer trainee Cadila pharmaceuticals - Ahmedabad, Gujarat July 2004 to May 2005 Developed internal application using VB.Net. Created crystal report and database using MS Access. Education Master of Science in Industrial Mathematics & Computer Applications North Gujarat University 2005 Bachelor of Science in Mathematics North Gujarat University 2002
