

Linux System Administrator Linux System Administrator Database Administrator Albuquerque, NM  
Innovative, resourceful Senior Database Administrator & UNIX/Linux Architect with 10+ years  
designing, installing and maintaining enterprise Oracle, DB2, and IDMS databases. Well versed in  
HP-UX, Solaris and AIX, and Linux systems administration, with proficiency in distributed Web &  
mainframe environments. Skilled at importing data from multiple sources into Oracle and  
contributing to migration and disaster recovery projects. Dedicated high-achiever, adept at  
analyzing complex problems and implementing solutions that are cost- effective, easily maintained  
and "right the first time". Exceptional ability to translate, communicate and document complex  
technical information to end-users at all levels. Strong organization, time management, and  
motivational skills; consistently able to deliver top-quality projects under the tightest deadlines. Work  
Experience Linux System Administrator State of New Mexico, Children, Youth, and Families -  
Albuquerque, NM July 2018 to November 2018 Installation, maintenance and configuration of  
SLES and RedHat Linux on VMWare based virtual machines. Relocated a data center from one  
geographic location to another Managed all disk systems using the NetApp software and  
hardware Proficient with the following Novell utilities - eDirectory, iManager, IPrint Administered  
Windows servers Responsible for installation and upgrade of Data Protector backup software  
Knowledgeable of the use of Active Directory Competent in the use of the of HP StorageWorks  
D2D Backup System Monitors and troubleshoots issues related to Novel, VMware, and Linux  
Worked extensively with HP hardware Oracle Database Administrator TEKsystems - Albuquerque,  
NM October 2017 to February 2018 Provide Database Administration support for Central New  
Mexico Community College Assists staff with Oracle Database support Worked on project that  
moved database files from NetApp storage to Tegile storage Assists staff with other ancillary  
software and applications Proficient in Oracle Database Administration Provides SQL Server  
and Microsoft Access support Monitors and troubleshoots issues revolving around the Oracle  
infrastructure using the Oracle 12c Grid Control. Environment: Oracle 11gR2 and Oracle 12c, Linux,  
VMWare, SQL Server, Oracle Enterprise Manager 12c Oracle Exadata Administrator State of New  
Mexico Workforce Solutions - Albuquerque, NM February 2016 to September 2017 Install,

configure, and maintain Oracle 11gR2 and 12cR1 systems on an Oracle Exadata Quarter Rack and Eighth Rack platforms Proficient in Oracle RAC and ASM technologies Provide patching support for the Oracle Exadata platform. Conversant with the Oracle 12c Multitenant Database Protocol Proficient with Oracle 13c Cloud Control software Responsible for patching Linux Oracle Servers Proficient with Linux yum and rpm manipulation. Monitor and maintain backup and recovery activities utilizing RMAN Install, maintain, and monitor the Oracle infrastructure using the Oracle 13c Cloud Control. Provide database support to Application Development team Backup SQL Server Database Administrator Install, configure and maintain disaster recovery system - Data Guard Responsible for day-to-day troubleshooting of the database infrastructure Makes requested structural changes to the databases Troubleshoot day-to-day databases issues Provides Oracle-related Linux support on the Exadata and SimpliVity platforms Comfortable with all aspects of Linux and Unix utilities and scripting Key Accomplishments: Successfully migrated Oracle from version 11G to 12C for all databases. Environment: SimpliVity, Exadata Oracle 12c, Linux Red Hat, Microsoft SQL Server, Oracle Enterprise Manager 13c, Toad TEKsystems September 2015 to February 2016 support for the City of Albuquerque Water Authority and the State of New Mexico Unemployment Insurance System Assisted with the conversion of the Oracle databases from a physical server platform to an all VMWare Virtual Machine platform. Installed and configured Linux on virtual machines Responsible for upgrading Linux machines Configured and installed the Virtual Machines used by the backend Oracle databases Provide patching support for the Oracle platform using the patch utility Implement backup and recovery activities utilizing RMAN Converted the Oracle Enterprise Manager from the Oracle Grid product to the Oracle 13c Cloud Control. Responsible for patching Linux Oracle Servers Proficient with Linux yum and rpm manipulation. Provide database support to Application Development team Functioned as the ESRI GIS Database Administrator Responsible for day-to-day troubleshooting of the database infrastructure Made structural changes to the databases Environment: Oracle 11gR2, VMWare, Linux Red Hat, Oracle Enterprise Manager 13c, Toad American Express Corporation - Phoenix, AZ May 2015 to September 2015 support for the State of New Mexico

Unemployment Insurance System      Install, configure , and maintain Oracle 11gR2 and 12cR systems on an EMC VCE VBlock platform      Provide patching support for the Oracle platform using the opatch utility      Implement backup and recovery activities utilizing RMAN      Monitor Oracle performance using the Oracle 13c Cloud Control.      Installed Oracle Goldengate product      Provide database support to Application Development team      Responsible for day-to-day troubleshooting of the database infrastructure.      Used Puppet to configure Linux and Oracle environments.      Made structural changes to the database      Environment: Oracle 11gR2, EMC V C E VBlock, Linux Red Hat, Oracle Enterprise Manager 13c, Toad Oracle Database Administrator e Solutions October 2013 to May 2015      Provide Database Administration support for the State of New Mexico Unemployment Insurance System      Install, configure, and maintain Oracle 11gR2 and 12cR1 systems on an Oracle Exadata Quarter Rack and Eighth Rack platforms      Proficient in Oracle RAC and ASM technologies      Provide patching support for the Oracle Exadata platform.      Monitor and maintain backup and recovery activities utilizing RMAN      Install, maintain, and monitor the Oracle infrastructure using the Oracle 12c Cloud Control. Provide database support to Application Development team      Backup SQL Server Database Administrator      Install, configure and maintain disaster recovery system - Data Guard      Responsible for day-to-day troubleshooting of the database infrastructure.      Environment: Oracle 11gR2, Oracle Exadata Quarter Rack, Linux Red Hat, Microsoft SQL Server, Oracle Enterprise Manager 12c, Toad Oracle Database Administrator TEKsystems - Colorado Springs, CO August 2013 to October 2013      Provide Database Administration support for various entities within El Paso County such as the County Assessor's office, Department of Health, Sherriff's department , County Coroner and others      Install, configure, and maintain Oracle 11gR2 system on an Oracle Exadata Quarter Rack platform      Proficient in Oracle RAC and ASM technologies      Responsible for maintenance o Linux Oracle servers      Migrate various Microsoft Access databases to Oracle and MySQL      Provide patching support for the Oracle Exadata platform.      Monitor and maintain backup and recovery activities utilizing RMAN      Install, maintain, and monitor the Oracle infrastructure using the Oracle 12c Grid Control.      Responsible for day-to-day troubleshooting of the database infrastructure.      Provides support for the JD Edwards development team      Environment:

Oracle 11gR2, Oracle Exadata Quarter Rack, Linux Red Hat, Microsoft SQL Server, Oracle MySQL. JD Edwards Application Suite, Toad Oracle Database Administrator Atmospheric and Environmental Research - Lexington, MA April 2012 to May 2013 Provide Oracle OBA support Air Force Research Laboratory for Satellite launch and operations center. Provide day-to-day general Oracle DBA support for several satellite programs. Install, configure, and maintain Oracle 11gR2 system. Configure and maintain a disaster recovery database using Oracle Data Guard utility. Extensive development of Perl and Python scripts for Linux, Solaris and Oracle support. Thorough knowledge of Bash and Bourne shell scripting. Maintain Oracle backup and recovery systems. Monitors day-to-day health and performance of the Oracle subsystem. Troubleshoots and corrects any deficiencies in Oracle daily operations. Works with developers to create new databases and database structures when requested. Consultant Glacier Technical Solutions LLC - Anchorage, AK February 2012 to April 2012 2-month assignment Provide Oracle database technical support for the USDA U.S. Forest Service in Albuquerque, NM. Provide Oracle 11g Release 2 RAC and ASM database support on Linux operating systems. Install, configure, and maintain Oracle 11gR2 RAC and ASM systems on Linux. Install, configure, and maintain Oracle 11gR2 Data Guard. Install, configure, and administer Oracle supporting products. Provide SQL Server 2008 Support for several projects. Functioned as a backup SQL Server Database Administrator. Environment: Oracle 11gR2, ASM, SQL, PL/SQL, SQL Server 2008, Linux Red Hat, Toad Level II HP-UX System Engineer Hewlett Packard Corporation - Rio Rancho, NM May 2011 to February 2012 Provide Level II HP-UX operating system engineering technical support to Hewlett Packard Customers. Provide Technical support for Core HP-UX, SD-UX, Ignite-UX, HPVM products. Develop and provide fixes for operating system product issues. Compose official Hewlett Packard HP-UX technical documentation. Ability to provide customers with workable solutions in a timely and an extremely professional manner. Environment: HP-UX operating systems Consultant Gantec Corporation - Schaumburg, IL July 2010 to May 2011 Oracle Database Administrator - 10-month project Function as Oracle Database Administrator for the State of New Mexico Department of Workforce Solutions - Unemployment Insurance Tax System. Provide Oracle 11g Version 1 & 2 database

support on Windows 2008 Server 64bit. Provide SOL Server 2008 Support Install, configure, and maintain Oracle 11gR1 and 11gR2 RAC and ASM systems on Windows 2008 R2 Install, configure, and maintain standby databases using Oracle 11gR2 Data Guard Install, and maintain Oracle database instances- Single Instance, RAC. ASM, Clustered File System Install, configure, and administer Oracle ancillary products. Utilizes RMAN for daily backup and database replication activities Proficient with the major Oracle utilities such as Data Pump, Export/Import, and SQL Loader Perform clones and refreshes of Oracle database environments. Makes structural changes to the Oracle Databases Assists with database conversion activities from DB2 legacy systems to Oracle Advisement concerning database best practices Proficient with ancillary Oracle products such as TOAD for the OBA Suite Windows 2008 R2 System Administration for Oracle Works effectively in a Tema environment Key Accomplishments: Successfully migrated data from the DB2 legacy database to the Oracle production database ahead of schedule and under budget. Developed all the UNIX and SQL Loader scripts that were used during the migration.

Environment: Oracle RAC 11gR2, ASM, Windows 2008 Server R2, Toad Senior Oracle Database Administrator Comcast Cable Corporation - Englewood, CO December 2008 to May 2010 Provide Oracle database administration support for the Comcast Neptune Billing System. Provide Oracle 10g and 9i database support Install, configure, and maintain Oracle 11gR1 RAC and ASM systems on Red Hat Linux Install, configure , and maintain standby databases using Oracle 11gR1 Data Guard Install, and maintain Oracle database instances- Single Instance, RAC. ASM. Partitioning Install, configure, and administer Oracle RDBMS products Developed an entire suite of PL/SQL scripts to support Data Life Cycle activities. Perform clones and refreshes of Oracle database environments Migrated legacy HP-UX Oracle environments to Red Hat Linux Oracle RAC environments Responsible for the application updates, patches and code releases. Implement performance management metrics using Oracle SQL and PL/SQL Log and Manage Oracle TARs. Troubleshoot problems and issues having to do with Oracle Software Implement partitioning with very large databases (multiple terabytes) Responsible for installing all Oracle software fixes and patches Implemented RMAN for database backup, cloning and Data Guard

implementation      Make structural changes to Oracle databases per Configuration Management requests      Upgrade and clone Oracle databases in various environments      Responsible for migrating changes within the database environments      Proficient with ancillary Oracle products such as TOAD for the OBA Suite      Work closely with customers and developers      Installs configures and maintains Oracle Data Guard configurations      Installed, configured, and supported Oracle Data Warehouse Builder.      Creating and maintaining Oracle-related Unix shell scripts for Linux

Synchronize data warehouse between database platforms      Proficient with ancillary Oracle products such as TOAD for the OBA Suite      Provide Oracle support to the Configuration Management Team

Develop and implement corporate-wide Information Life Cycle Management procedures Senior Oracle Database Administrator EDP Recruiting Services, Inc - Englewood, CO September 2008 to December 2008      Provide Oracle database administration support for Comcast Cable Corporation Neptune Billing System.      Support database platform on Oracle/Linux RAC environment      Install and maintain multiple Oracle database instances      Troubleshoot problems and issues having to do with Oracle Database Management Software      Responsible for installing all Oracle software fixes and patches      Make structural changes to Oracle databases per developer request      Responsible for migrating changes within the database environments      Work closely with customers and developers      Creating and maintaining Oracle-related Unix shell scripts for Linux Consultant ISYS Technologies - Littleton, CO April 2008 to August 2008 Oracle Database Administrator - 3-month assignment      Primary Database Administrator for the WIPP Waste Management databases      Wrote PL/SQL procedures that identified security risk factors in the Oracle Environment      Work with Oracle Manufacturing Application software      Troubleshoot problems and issues having to do with Oracle Software      Make structural changes to Oracle databases per developer request      Work closely with customers and developers      Worked to seamlessly connect CVS with the Oracle development tools

Create and maintain Oracle-related Unix shell scripts DBA Knowledge Englewood, CO February 2008 to April 2008 Consultant: Oracle Database Administrator - 3-month assignment      Contributed as a datacenter move consultant.      Provide consultation with regard to a data center move onsite for Yellow Pages Inc, Macedonia, Ohio      Responsible for all data movement      Install new Oracle

RAC databases on Red Hat Linux Education B.A. in English St. Francis University - Loretto, PA May 1974 Skills DB2, MS SQL SERVER, SQL SERVER, ORACLE, ORACLE 10G, Linux Administrator, Redhat, System Administrator, Red Hat, System Admin, Vmware, Linux Links <https://www.linkedin.com/in/scottbing> Additional Information Technical Skills Databases: Oracle, MS SQL Server, DB2, IDMS Platforms: Oracle Exadata, EMC VCE VBlock, AIX, HP-UX, Solaris, Linux, Windows Servers (Multiple versions), IBM Mainframe Operating Systems Languages: Java, J2EE, JSP, Servlet Technology, Struts, Faces Apache Server, Tomcat, C#, C++, C, Visual Basic.NET, XML, PERL, Python, REXX, COBOL, Assembly, Android Tools: Oracle Real Application Cluster Technology (RAC), ASM, Oracle Data Guard, SQL, PUSQL, ESRI ArcSDE, Oracle Utilities, EMC Symmetrix, Ascential ETL tools, Erwin Modeler, Toad, Oracle 10g, 11g, and 12c Grid Control, bash, vim(vi), mailx, iptables, sftp, grep, sed, awk, find
