Work Experience

IT PROJECT MANAGER / SME US COURTS - Washington, DC April 2018 to Present

Identified the purpose and business need of the Windows 10 Migration and assisted in developing the project charter. Performed trend analysis of project status and root cause analysis of current issues. Collected the requirements from stakeholders in regard to Group Policies, Standard applications and Non-Standard applications, the ISO and Federal Government security parameters and the different levels of privileges based on the user profile. Developed the Project Management Plan, which include but not limited to Scope Baseline (including WBS), Schedule Management Plan, Resource Management Plan, Quality management Plan, Procurement Management Plan and other relevant project documents. Completed the image on time and schedule and had it reviewed and approved by the ISO for implementation. Managed communication with vendors, conducted bidder conference, RFI, RFP and vendor selection, provided business justifications to the functional manager and secured funding for the resources above. Worked with the vendor on site for the Windows 10 Profile Migration Tool to implement and successfully install, test and deploy in the environment. Crafted and developed training manuals, Work Instructions and Checklist for successful deployment of Windows 10 machines from bare hardware to end user workstation deployment. Performed Acquire and Develop Team processes, interviewed, selected and managed the team of Windows 10 technicians. Developed and managed the communication plans with Stakeholders, Sponsor, Customer, functional managers and the project team. Developed and scheduled all communications to the end users prior to deployment and surveys for feedback after deployment resulting in a 95% customer satisfaction. Developed a detailed list of all constraints, assumption log, issue logs and risks associated with the project and created contingencies and buffers to mitigate all risks successfully. Conducted meeting, Focus Groups, interviews and feedback loop. Created affinity Diagrams, mind mapping diagrams and engaged SMEs to develop best practices. Created and managed Change Requests with all documentations and procedures, and had it approved by the Change Approval Board after analyzing the impact and necessity of each change request on the project and fully vetting and

explaining my recommendations for approving such CR. Successfully brought the Project from Red when first came in to Green status in less than 2 months. Estimated the all activities from proof of concept of the Enterprise Windows 10 Gold Image to the testing, troubleshooting and deployment of the same in the environment. Build FAQs for Stakeholders on how to navigate through Windows 10. Performed configuration management for Office 365 applications and successfully provided resolution focusing on Customer Service and SLA agreement. Planned, executed, monitored and controlled all Office 365 Migration ensuring proper follow up, training and communication with the end users and all Stakeholders. Provided Exchange/Office 365 support, maintenance, and administration (Account provisioning, migration from Exchange to office 365, distribution group creation). SharePoint administration and support. Conducted status report meetings and developed reports for senior management
