

WEB DESIGN AND DEVELOPMENT INTERN WEB DESIGN AND DEVELOPMENT INTERN WEB DESIGN AND DEVELOPER San Francisco Bay Area, CA Motivated Entry Level Software Engineer committed to working in fast-paced environments while maintaining quality standards. Adept at learning new concepts and applying acquired knowledge of basic functions. Work Experience WEB DESIGN AND DEVELOPMENT INTERN HEALTH CONNEXIONS, INC August 2016 to July 2017 Preparing the blog functionality on the website Transferring information and formatting it, from the old version to the new website version Using WordPress, Divi builder, HTML technologies Provide necessary support to design and development team to produce front end codes. FRONT END WEB DEVELOPER AFLAC INC - Pasadena, CA September 2015 to May 2016 As a Web Design and Development Intern, Initially, I was working on web page design and development of using JavaScript, HTML, CSS, and Bootstrap 3. The project was spread across multiple modules. I was involved in designing and developing two part of responsive web page. I created multiple designs with Bootstrap 3 and successfully I designed that module. In other enhancement, I was also creating UI prototypes before starting development and recently I was involved in developing one more web page of website that's recruitment page and two section of that page such as Pre-registration section and footer section are assigned to me. In Pre-registration section, there was one popup box and it contains one confirmation button. I also got chance to learn how to redirect from one web page to another web page. I also got a chance to work on Database MySQL. During this project, my task is to install database and create a table as per requirement and read data through program and display on browser using PHP language. I learned new tools and technologies with respect to web design, configuration management tools (Like Git), responsive design techniques, and other things pertaining to web design using HTML, CSS, Bootstrap and JavaScript, jQuery, AJAX, JSON, WordPress, PHP. As of now me and my team have created responsive web page with Bootstrap 3. RAPID TEST CARD READER January 2010 to June 2010 Designed and constructed a prototype of rapid test card reader using a photo-sensitive device. Investigated the result of the test card which shows whether the test is positive or not and whether the test card was invalid Project Team was interviewed by a journalist project work article was

published in DNA Newspaper (one of the India's prominent Newspaper) Education Master's in
Software Engineering International Technological University - San Jose, CA September 2014 to
June 2016 Bachelor's in Biomedical L.D. Engineering College - Ahmedabad, Gujarat August 2006 to
June 2010 Skills Javascript, MySQL, Git, HTML 5, CSS, jQuery Certifications/Licenses CSS Flexbox
