

SQL Database Admin/Analyst SQL Database Admin/Analyst SQL Database Admin/Analyst - United Parcel Service Louisville, KY Sponsorship required to work in the US Work Experience SQL Database Admin/Analyst United Parcel Service - Louisville, KY March 2017 to Present

Accomplishments: Part of the DBA team providing On Call production support to the clients. Responsible for ensuring uptime of all database servers through monitoring tools. Worked in troubleshooting connectivity issues raised by Application users. Updating with latest service packs and security patches. Installed, configured and administered SQL server 2016, and migrated data from SQL server 2012/2008 to 2016. Installation of SQL Server 2016 on Standalone Servers and Cluster nodes. Applying Service packs and Patches on standalone servers & cluster nodes. Configured and Managed Database High Availability solutions: Replication, Database Mirroring, Log Shipping, and Clustering and Always On availability. Configured, monitored and troubleshoot SQL Server mirroring between two data centers. Created documentations of installations, migrations, upgrades, backups, restores, maintenance plans and database security parameters, disaster recovery (DR). Assisted with administering and maintaining the enterprise's production and development databases. Supported database back-up and recovery procedures for the enterprise's databases. Assisted in development of database management system support activities. Supported the utilization of database management system software and tools to monitor performance. Assisted with installation, configuration and deployment of software programs and patches to ensure software tools are maintained to meet business requirements. Provided on-call support and coverage to ensure continuity of business operations. Raised issues as appropriate to support effective resolutions. Assisted with applications reviews to identify needs and to implement data improvements.

SQL Database Administrator Ventois - Westborough, MA March 2016 to January 2017 Accomplishments: Developed administrative tasks of SQL Server for performing daily Backups and Recovery procedures. Administered SQL Server by creation of user logins, groups with appropriate roles, monitored the user accounts, and granted the privileges to users and groups. Configured Database Maintenance Plans for Backups, Re-indexing, and Reorganization of Indexes, Cleanup History, and Update Statistics. Administered Regular Database Backups,

Restoration, Performance tuning, backup processes. Provided Database Support for various production applications in resolving complex issues. Involved in Disaster Recovery procedures, and Contingency plans. Testing and implementing procedures. Engaged in setting up Database Security and maintain accounts and access levels by creating suitable Logins and Roles and assigning object level permissions. Created the maintenance plan for SQL Server database optimization and integrity checks for production servers. Dropped and recreated the indexes on tables for performance improvements. Used Index tuning wizard for Tuning of indexes. Created Clustered and Non-Clustered indexes on tables. Wrote T-SQL statements using DML and DDL for retrieval of data. Performed DBCC utilities and fixed data corruption in application databases. Configured SQL Servers with appropriate settings to resolve various resource allocation & memory issues. Involved in replication setup, configuration and maintenance in Transactional Replication.

SQL DBA ITC Infotech - Hyderabad, Telangana May 2012 to October 2014 Accomplishments:

Installed and configured MSSQL 2008. Successfully migrated from SQL Server 2005 to SQL Server 2008 on Production and Development environment. Implemented stand by servers using log shipping for high availability and improved performance. Performed database backup, recovery, disaster recovery procedures and troubleshooting. Successfully implemented database mirroring between primary server and mirror server in Production. Managed the production and development databases for performance tuning, capacity planning and SQL Server clustering and database security configuration. Involved in managing security for users by creating logins. Managed logins and users, including permissions and restrictions, for MS SQL Server. Dropped and recreated the indexes on tables for performance improvements. Used Index tuning wizard for Tuning of indexes. Performed performance tuning on the slow running queries and optimizing the databases. Managed the Security creating Users, Groups and Roles in SQL Server. Managed the Failover Cluster Manager to ensure High Availability (HA). Used clustering for the high availability environment. Archived and backed up data on daily and weekly basis. Evaluated database performance and performed maintenance duties such as tuning, backup, restoration and disaster recovery.

Education Master's degree in Computer Science in Computer Science University

of New Haven - West Haven, CT Bachelors of Technology in Technology JNTU - Kakinada, Andhra Pradesh
