

Network Administrator Network Administrator Network Administrator - U.S. Marine Corps Amarillo, TX A dedicated and experienced networking systems administrator who balances the necessity of customer service as well as information confidentiality, availability, and integrity. Fully capable of working alone or as a member of a team, and comfortable exercising initiative and innovative problem solving solutions. Work Experience Network Administrator U.S. Marine Corps June 2014 to June 2018 Supervised installation and maintenance of \$4 million dollars worth networking equipment resulting in zero loss over a 4 year period. Coordinated the transportation of gear to 5 different countries and established command operation centers for commanders fully equipped with data, voice, and video teleconferencing capabilities on unclassified and classified networks. Restructured networks to support unplanned units requesting short notice support of networking services, supplementing user support. Appointed Cyber Security Officer (CSO) for my command operation center, I confiscated unauthorized devices and external mass storage devices that introduced malicious malware to the network, quarantining them, scanning them, and documenting the nature of exposure. Learned and utilized Powershell application to gather information on computers on my network and conducted printer installation, Organizational Unit migration, and hard drive encryption evaluation to meet time constraints of deadlines and alleviate inaccessability of computers. Education Security + Certification U.S. Marine Corps Cyber Network Operations school Skills Cisco device configuration (4 years), Cisco, Ccna, System Administrator, Vmware, NOC Military Service Branch: Marine Corps Service Country: United States Rank: Sergeant June 2015 to June 2018 Network administrator 0631
