

Front- end developer Front-end developer Front- end developer - ASO systems Yonkers, NY  
Authorized to work in the US for any employer Work Experience Front- end developer ASO systems  
- Brooklyn, NY July 2015 to Present Responsibilities: Worked in Waterfall methodology approach  
for UI Development. Involved in Full Software Development Life Cycle (SDLC) and identifying the  
requirements and defining the business rules to user requirements. Built rich prototypes and  
applications using HTML5, SCSS, JavaScript, jQuery, JSON, AngularJS and Bootstrap with SQL  
database. Worked with AngularJS ui-routers, forms, modules, DOM, events, expressions,  
controllers, filters, factories, configs and http get and post requests. Transferred data between  
front- end and back- end using AngularJS http request on front end, and PHP on server side.  
Used local SVN as a collaboration and source control tool in a daily basis. Created complex client  
side forms and form validations using AngularJS. Interacted with Project Manager and back- end  
developers to resolve software, and back end related bugs and issues. Wrote application level  
code to perform client side validation using AngularJS. Using advanced level of jQuery, JSON,  
HTML5, CSS3 and pure CSS3 layouts Implemented the responsive layout for the UI of the  
application and Bootstrap 3 responsive framework using 12-grid scaffolding system. Implemented  
Ajax calls to the server to embed search application results in AngularJS using the \$http service.  
Interacted with Project Manager, Business analyst and back- end developers to discuss and resolve  
UI, and API related issues. Junior Front- end developer ASO systems - Brooklyn, NY July 2014 to  
July 2015 Responsibilities: Writing the JavaScript, JQuery, AngularJS, JSON and Ajax to handling  
the Client side validations and dynamic page updates. Worked with AngularJS routers, forms,  
modules, DOM, events, expressions, controllers, filters and http Request. UI development with  
technologies like HTML 5, AngularJS and jQuery. Designed CSS3 and Bootstrap based web  
pages which were cross-browser compatible. Providing a responsive, AJAX-driven design using  
JavaScript libraries such as jQuery, AngularJS and Bootstrap JS. Interacted with Project Manager  
and back- end developers to resolve software, and back end related bugs and issues. Closely  
worked with business system analyst to understand the requirements to ensure that right set of UI  
modules been built. Coding, testing of reusable JavaScript, CSS3, HTML5 widgets / libraries for

complex UI controls. Performed a lot of DOM operations for loading and manipulating dynamic content on web pages. Developed callback functions to parse and handle JSON data returned from the server. Developed all client-side logical implementation part of applications with AngularJS controllers under specific modules, manipulating nodes in DOM tree. Education Bachelor's in Computer Systems Technology Empire State College - Saratoga, NY 2013 to June 2018 Skills AngularJS (2 years), Javascript (3 years), HTML 5 (3 years), CSS3 (3 years) Additional Information Skills Front End Web Development ( HTML5, CSS3, Bootstrap 3, SASS, LESS, JavaScript, jQuery, AngularJS, AJAX, JSON, Responsive Web Design and Development - Desktop, Tablet and Mobile.) Experience with GitHub workflow Working knowledge and thorough exposure on compatibility issues with different versions of browsers like Internet Explorer, Mozilla Firefox, Safari and Google Chrome. Experience using SCSS/SASS/LESS preprocessors of CSS Skilled at analyzing and solving browser compatibility challenges and possesses ability to maintain consistency and well commented HTML and CSS markup. Hands on experience creating in creating AngularJS custom filters, directives, factories/services, ui-routes, data-binding using RESTful API service calls Strong analytical and problem solving skills in software development and a high-aptitude in developing software solutions for a wide range of applications. Experience with Software Development Processes & Models: Agile, Waterfall, & Scrum Model Experience applying the latest development approaches including MVC, event-driven applications using AJAX, Object Oriented (OO) Java Script, JSON, and XML. Coding and debugging applications in JavaScript, jQuery and AngularJS. Strong communication skills, with the ability to convey concepts/requirements between technical and non-technical stakeholders. Microsoft Office 2003/2007/2010/360; Word, Excel, PowerPoint, Access, Outlook and Skype for business.
