

Infrastructure Engineer Infrastructure Engineer Senior Systems Engineer Miami, FL Authorized to work in the US for any employer Work Experience Infrastructure Engineer Assurant - Miami, FL February 2017 to Present Senior Systems Engineer Charlotte Russe - San Diego, CA February 2017 to February 2018 Management and maintenance of Nutanix AOS, AFS and Prism Lead projects for the infrastructure team- AD DFS, AD/ FFL upgrade, Nutanix implementation Migrated off NetApp file level storage to Nutanix AFS Reconfigure vCenter networking on Nutanix Platform Lead VMware migration of legacy hardware to Nutanix Hypervconverged platform Windows system administration, DNS, DHCP, GP, PowerShell scripting, Remote App Troubleshoots areas of poor performance and identifies effective solutions to resolve issues both in the immediate future and for the longer term Installs, supports, maintains, and monitors all system infrastructures functions and services. Maintains accurate and current documentation of the system infrastructure environment, including installation settings, specifications and system requirements Provides advanced technical support for technicians to successfully resolve problems. Systems Engineer Bridgevine, Inc - Miami, FL May 2014 to February 2017 Responsible for all infrastructure including colocation facilities and cloud environments Build, manage and secure, virtual datacenters utilizing VMware vCloud Suite architecture. Deployed VMware view VDI environment, utilized for compliance controls for access, Deploying, managing and securing Microsoft server 2008, 2012, AD services, DNS and group policy. Design and manage DR processes to meet company SLAs. This includes fully redundant infrastructure Budgeting and Vendor management Design, re-architect and build storage environment, proper allocation of resources, adequate performance expectations for SAN-backed VMware vSphere infrastructure and DAS-backed SQL cluster. Lead storage environment operations: Installation, LUN provisioning and allocations, capacity monitoring, performance tuning, firmware updates, etc. Responsible for developing a secure standard operating environment for Windows Server 2003, Windows Server 2008, Virtual Infrastructure using VMware vSphere 4.1/5.5 and SAN devices to be in compliance with PCI DSS standards. Document and implement in Active Directory Group Policy Objects (GPOs) to harden Windows Servers Monitor hardware, services and resources using What's Up Gold and Veeam One, Solar

Winds Orion Systems Administrator/Assistant IT Manager GAZIT GROUP - Miami, FL September 2008 to May 2014 Responsible for acquiring, configuring and maintaining the corporate IT network including physical servers, backup platforms, and other peripheral hardware. Maintaining Data connectivity of local and overseas offices, as well as maintaining documentation and associated administrations regarding routers, firewalls, switches, usage, down time and various system updates including anti-virus and operating system patches/upgrades. Identify IT requirements, designs, configures and implements virtual networks, tests and implements software/firmware upgrades, maintain clients and site-to-site VPN tunnels. Maintain back-up hardware and software for corporate servers; identify strategies for disaster recovery implementation and maintenance of disparate server platforms. Maintain, configure and set up all Cisco IP phones in all offices Responsible for Mobile management for all company devices, setup and configurations. Design, setup and administer virtual infrastructure using VMware vSphere 4x/5x Administer Exchange 2007/2010 Monitor published core applications on Citrix XenApp Plan and manage technology projects to include such activities as system upgrades, implementations and process improvements.

Management of Regional Infrastructure, Operations and Helpdesk Oversees day-to-day operations to include prioritization, special assignments and workload Have overall responsibility for financial (budget/forecast) for USA IT Drive cost down, responsible for Operations costs optimization Manage local and regional vendor to deliver solution or service that meets the business requirements Coordinate Disaster Recovery Drill together with vendor and third parties Drives platforms operations cost reduction, working with the vendors Administer SharePoint intranet sites, internal and external users for SOX audits Network Administrator FIRST CONTINENTAL MORTGAGE, LLC - Houston, TX July 2007 to August 2008 Oversaw the day-to-day operation of the network via monitoring tools Monitored network usage to ensure security of data and access privileges; install, support and maintains network servers Established and maintained user accounts, profiles, file sharing, access privileges, and security . Support, test, and troubleshoot hardware and software on local desktops and servers . Setup and monitored accounts and devices on Blackberry Enterprise Server Setup and monitor VPN tunnels using

SonicWALL and Cisco ASAs    Managed Citrix Servers and all published applications    Utilized Symantec Ghost to manage and maintain automated system imaging deployment Desktop Analyst LLOYDS REGISTER AMERICAS - Houston, TX July 2006 to July 2007    Planned, installed, and maintained network and data communications software    Assured system backups were performed and restores tested    Coordinated regional project migrations, including rollouts of hardware and software    Upgraded and reconfigured existing hardware; configured new hardware as required and insure efficient operation and effective maintenance of all computer equipment for offices in the United States, Central America, South America, Canada and Mexico.    Used Remedy helpdesk to ensure ticket SLAs were being kept. IT Technician CONTINUCARE CORP - Miami, FL June 2004 to April 2006    Installed, configured, and supported Windows based server and XP professional systems.    Managed Persysent Technology iNode Professional imaging solution to perform installations of workstation operation    Administered and supported Citrix MetaFrame systems    Troubleshoot computer, laptop, network hardware and other technologies    Deployed Symantec Antivirus Corporate Edition with centralized point of management Education New Horizons Technical School - Miami, FL 2010 Associate of Applied Science in Computer Network Engineering in Computer Network Engineering Florida Career College - Miami, FL 2004 Skills Cisco (6 years), Exchange (5 years), firewalls (5 years), VMware (9 years), VPN (6 years), Active Directory, Linux, System Administrator Additional Information Skills Summary    ? Core technologies - Nutanix AOS, AFS, VMware vSphere, Microsoft Exchange Server 2003/2007/2010, Office 365 management, Microsoft IIS, Microsoft Remote Desktop Services, , Backup and Replication, Active Directory, Cisco UCS Computing, Dell/HP/EMC SAN administration    ? Virtualization: Design, support and troubleshoot VMware vSphere 4.1/ 5.1/5.5/6/6.5 environment.    ? Firewalls: Cisco ASA 5505/5510, Fortinet Fortigate FW, SonicWALL TZ series    ? Hardware: Cisco UCS Chassis, Cisco B200m Blade server, Dell and HP server hardware,    ? SANs: Dell Equallogic PS series 4000/5000/6100x, Dell Powervault 3000, 3200i, EMC VNX 5100, HP MSA 2400    ? NAS: Synology, Qnap, Western Digital Personal Cloud    ? Backup software: Asigra DS Client, Dell AppAssure, Veeam, CA D2D, Nutanix Domain protection    ? Operating Systems: Windows XP/Vista/7/8/10, Microsoft Windows Server

2003/2008/2012/2016 ? Open Source Technologies: Ubuntu based OS, Centos ? Phone Systems: Panasonic PBX, Cisco BE 6000 Phone Systems, 8X8 VoIP ? Video Conferencing: Polycom, Tandberg TMS, EX series, MCU and VSC/VCSe controls ? Mobile Communication: Apple iPads, iPhones, Android and Windows phone platform ? Networking: LAN/WAN, WLAN configurations upgrades and implementations, VPN, network utilization, network load balancing, monitoring, content filtering, NAT, port forwarding
