

JAVA WEB SERVICES/SOA DEVELOPER JAVA WEB SERVICES/SOA DEVELOPER JAVA WEB SERVICES/SOA DEVELOPER Phoenix, AZ ? Over 5 years of progressive experience within the multinational financial services, banking and healthcare domain as Java/J2EE developer. ? Strong background of working knowledge in all the phases of software development life cycle with strong analytical, programming skills and having solid functional experience in the development, implementation and the maintenance of complex Java/J2EE based systems. ? Extensive experience in AGILE Methodology and seeking an individual and contributes to development of project schedules, story pointing, provides work and times estimates, and is committed to meeting deadlines. ? Experience in utilizing java tools in Web, and client-server environments including Java Platform, Enterprise Edition ( Java EE), Enterprise Java Bean (EJB), Java Server pages (JSP), Java Servlets including Struts and Java Database Connectivity (JDBC) technologies. ? Hands on experience in designing and developing distributed and multithreaded applications with technologies such as core and advanced Java technologies, JSP, Servlets, Java Script, jQuery, Oracle, Web Services, Struts, Spring, Hibernate, ANT, JDBC, JNDI, JUnit and XML-related technologies. ? Strong in Object-Oriented Design and Programming and multi-tier Web Architecture. ? Good knowledge of Stateful/Stateless Session EJBs and Entity EJBs. ? Developed Client applications to consume the Web services based on both SOAP and REST protocol. ? Wrote test cases in JUnit and performed in depth Unit, System and Regression testing. ? Used Firebug and Send Http Tool to inspect, edit and monitor CSS, HTML5, JavaScript and requests in any web page. ? Extensively used XML, and JSON Parser. ? Worked with Eclipse IDE and IntelliJ. ? Extensive experienced with Application servers and Web servers (Oracle Web logic 10.3, IBM Web Sphere 5.x and Tomcat 5.x). ? Strong hands on experience in implementing Design patterns like MVC, Singleton, Data Access Object, DTO, DAO, Session Fa ade, Flyweight, Delegate and Factory Patterns. ? Experience in writting services to store, retrieve and delete user records from the MongoDB for the application. ? Experience with Web technologies like JQuery, JSON, JavaScript, HTML, XML and CSS. ? Experience with server technology NodeJS. ? Hands-on experience in tools like Rally, JMeter, SOAP UI, JIRA and POSTMAN. Authorized to work in the US for any employer Work Experience

JAVA WEB SERVICES/SOA DEVELOPER AMERICAN EXPRESS - Phoenix, AZ July 2018 to April

2019 RESPONSIBILITIES: ? As a developer, ensured business requirements are correctly translated into functional requirements, design specifications and specifically source code. ? Worked with PM's to break down work effort and establish deliverables for the project. ? Experienced with retrospectives, Sprint planning, and all agile methodologies. ? Developed a code for Web services SOAP, REST using XML, JSON and used SOAP UI tool for testing the services. ? Written necessary EJB components to parse, process the XML messages to the next layer, establish the database connection, communicate with database, handle the Exceptions, Errors and log the different levels of messages. ? Developed EJB Session Bean for implementing business logic. ? Expertise Experienced in JUnit Test case using JUnit, Mockito and PowerMock for private variables. ? Worked with front end developers in the process of defining RESTFUL API's. ? Involved in configuration and deployments of application on local JBoss Server. ? Maintain GIT branches during project development, conduct merge and use MAVEN for building and deploying the applications using IBM Websphere. ? Experienced in using POSTMAN to interact with API's setting up complex HTTP request and reading response. ? Called the Restful web service calls for POST, PUT, DELETE and GET methods. ? Performed Web Services testing using our own built XML and JSON parser. ? Experienced and implemented architecture patterns like Singleton and Factory patterns. ? Monitored logs using Splunk Tool debug the issues. ? Prepared Unit test case using JUnit and used Jenkins for continuous integration testing. ? Managed team of four co-worker on five separate projects, ensuring projects were completed on time. ? Practitioner experience in UI development using Angular 2.0. ? Implemented AngularJS Controllers to maintain each view data. ? Developed AngularJS components such as controllers, Services, filters and models. ? Used AngularJS Http Request to read data from web servers and process JSON data to render in the UI.

ENVIRONMENT: Core Java, J2EE, EJB, Web service, REST, SOAP, SOAPUI, JSON, XML, POSTMAN, Jenkins, GIT, JBoss Server, IntelliJ IDE, IBM Websphere, MAVEN, AngularJS, Agile/Scrum methodologies, JUnit with Mockito, HTML, Css3, NodeJS. JAVA/J2EE DEVELOPER AVAILITY - Indianapolis, IN April 2016 to May 2018 RESPONSIBILITIES: ? Involved in various

phases of Software Development Life cycle (SDLC) of the application for requirement gathering design, analysis and code development. ? Worked on core java concepts like Collections, Multi-threading and Exception Handling for writing the backend API'S. ? Used JAX-RS (REST) for producing web services and involved in writing programs to consume the web services using SOA framework. ? Implemented Web Services to integrate between different applications (internal and third party components) using RESTFUL services. ? Worked on advance REST client plug-in to run the REST API on local host JBoss Server. ? Integrated testing framework using SOAP UI tool for testing exposed web services. ? Involved in defining build process with MAVEN and customizing through CI builds using Jenkins. ? Built a custom cross-platform architecture using Java, Spring Core/MVC, and Hibernate. ? Implemented MVC architecture using JSP, Spring, and Hibernate and used Spring Framework to initialize managed beans and services. ? Involved in development of Agent Verification System using Spring MVC framework. ? Used Spring Inheritance to develop beans from already developed parent beans. ? Used Spring AOP for logging, auditing, transaction management to distinguish business logic from the cross cutting concerns. ? Used Spring Security for Authentication and Authorization of the application. ? Designed MVC architecture and Front control design pattern using Spring MVC Framework for Presentation tier and also written code for the using Spring MVC Framework for Presentation layer and Spring dependency injection. ? Used XML parser APIs such as JAXP and JAXB in the web service's request response data marshalling as well as un-marshalling process. ? Involved in defining build process with Maven scripts and customizing through CI builds using Jenkins. ? Mostly used JIRA to update the JIRA ticket as the work progresses. ? As a member of development team, will be working with architects, other developers, support teams and customers in fast paced collaborative and iterative environment. ? Talented program solver able to think outside the box. ENVIRONMENT: Java, Spring, REST, SOAP, MAVEN, Jenkins, JSON, GIT, SSH, HTML, CSS, JavaScript, JQuery, AngularJS JAVA/J2EE DEVELOPER REALMED, INDIANAPOLIS February 2015 to March 2016 RESPONSIBILITIES: ? Understanding user requirements, participating in design discussions, implementation feasibility, analysis both at the front-end and backend level and documenting requirements. ? Participated in

code review and peer review meetings for the design docs. ? Developed and debugged the application using Eclipse IDE. ? Performed Unit testing, Integration Testing and generating of test cases for web applications using JUnit and documented web applications and code. ? Responsible for designing Rich user Interface Applications using JavaScript, CSS, HTML and AJAX. ? Wrote SQL Queries and stored procedures using SQL queries, constraints, views, Export/Import and connected database using JDBC API. ? Used ANT as build tool and developed build file for compiling the code of creating WAR files. ? Analyzed the performance of the application using JMeter. ? Responsible for setting up stage/pre-prod environments deploying the services into staging servers. ? Worked with multiple projects and work stream concurrently. ? Supported the Production Team members in the development and testing of production Implementation.

ENVIRONMENT: Java, Spring, ANT, Jenkins, GIT, XML, LDAP services, JUnit, HTML, CSS, JavaScript, JQuery, AngularJS, JUnit with Mockito. JAVA/J2EE DEVELOPER FIRST AMERICAS -

Santa Ana, CA May 2014 to January 2015 RESPONSIBILITIES: ? Gathered business requirements, authored High Level Design (HLD) and Detailed Design (DLD) for each independent module of the project. ? Ability to create user interface components that are modular, scalable and maintainable. ? Strong knowledge of Object-Oriented Design principles and Design patterns. ? Coded Action classes, Java Beans, Service layers, Business delegates, to implement business logic with latest features of JDK 1.5 such as Annotations and Generics. ? Contributed to Servlet based application development. ? Used Spring Framework extensively for Controller and View Components. ? Implemented Design Patterns like Singleton, Factory, Template and DAO patterns. ? Assisted in maintaining and updating existing applications and modules. ? Collaborated with a team of developers to build a multi-tier complex Enterprise Java component. ? Provided assistance and support to programming team members as required. ? Good understanding of design principles, user interfaces, Web standards and reusability. ? Developed software solutions according to the quality and delivery standards of the program. ENVIRONMENT: Java, Spring, GIT, XML, LDAP services, Spring, Spring MVC, Spring Webflow, Spring, Spring Security, JUnit, HTML, CSS, JavaScript, JQuery. Education BTech in Computer Science Engineering, JNTU, India

JNTU Skills AngularJS (4 years), HTML (4 years), J2EE (4 years), JAVA (4 years), XML (4 years),  
Linux, Javascript, SQL, jQuery, SQL Server
