Backed up the software and database on a weekly schedule. Insured there was a clean backup
before any Drupal updates to minimize potential data loss. Explained to new users what
permissions they had when it came to database access. Made sure that those users who needed
to add data to the database did so without errors. Instructed the users if errors came up during
insertion of data and how to make sure they did not happen again. Removed users from all
databases when they left the organization. Successfully recovered the database from 4 separate
times where data could've been lost. Successfully moved CPanel and Drupal with its associated
database to a new webhost with no data loss. Education Bachelor of Science in Information
