

Cyber Security Analyst Cyber Security Analyst Cyber Security Analyst Silver Spring, MD A Cyber Security Analyst with vast experience in Managing and Protecting Enterprise Information Systems, Network Systems and Operational processes through Information Assurance Controls, Risk Assessment, Vulnerability Assessment in accordance with NIST, FISMA, OMB and industry best Security practices. Authorized to work in the US for any employer Work Experience Cyber Security Analyst Arlington County - Arlington, VA April 2016 to Present

- * Coordinate and manage team activities during assessment engagements for Major Application Systems and General support systems (GSS).
- * Creating Security Assessment Plans (SAP) to initiate Information Security Assessment.
- * Conduct assessments of security controls on Information Systems by interviewing, examining and testing methods using NIST SP 800-53a rev4 as a guide and documented control findings and status from Risk assessment and recommend solutions with detailed action plans in Security Testing and Evaluation (ST&E) worksheet.
- * Review and update System Security Plan (SSP) based on findings from Assessing security controls using NIST SP 800-18 rev1, NIST SP 800-53a rev4 and NIST SP 800-53.
- * Enter control findings and status from Risk Assessment in Security Testing and Evaluation (ST&E) and develop Plan of Actions and Milestones (POA&M) for security controls that should be put in place to remediate vulnerabilities.
- * Generate Security Assessment Reports (SAR).
- * Develop Contingency plans, Disaster Recovery Plans and Incident Response plans for Information Systems using NIST SP 800 - 34.
- * Facilitate Kick off meetings and follow-up meeting with Management during projects.

Information Security Analyst State of Maryland - Maryland November 2013 to March 2016

- * Conducted Security assessments on GSS and Major applications in production.
- * Created Security Assessment Plans (SAP) to initiate Information Security Assessment.
- * Investigated recurring and related operating system failures/inefficiencies by reviewing system logs.
- * Managed process for user's compliance with routine identity and access management policies and procedures
- * Ensured that system patched were constantly installed and did go through the change management processes.
- * Categorized information systems and developed System security plan for them based on NIST SP 800-60 and NIST SP 800-18.
- * Selected and Tailored Security Controls for Information systems based on control

baselines and high water mark using NIST SP 800-53a rev 4. * Conducted vulnerability assessment and validated remediated vulnerabilities. * Conducted Assessment on Contingency plans using NIST SP 800 - 34. * Created Security authorization package (SSP, SAP, SAR and POA&M). * Updated SSP with the Information System owner when necessary. * Developed Plan of Action and Milestone (POA&M) to ensure that adequate controls are implemented. * Performed continuous monitoring on Information systems using NIST SP 800-137. IT Support Specialist FinaTrust Bank December 2011 to September 2013 * Served as the initial point of contact for resolution of helpdesk issues. * Provided client support and technical issue resolution via telephone calls, E-Mail, instant messages and other electronic medium. * Monitored security access in and out of the facility. * Granted security access to authorized staffs and contractors into the facility * Worked with the ticketing/tracking system to document, track and report work orders and/or escalated problem ticket. * Troubleshoot, researched, diagnosed, documented, and resolved technical issues surrounding Windows operating systems. * Followed detailed information security policies, procedures, and practices in granting access to users. * Managed process for user's compliance with routine identity and access management policies and procedures * Assisted with appropriate and immediate actions needed to restore normal services with minimal down-time. * Set up user accounts, regulated and monitored file access to ensure confidentiality and proper use. * Tested, evaluated and installed new versions or authorized modifications to custom and vendor-supplied operating systems, antivirus and related software * Assisted in the design and configuration of wired network for effective communication between computers, printers, scanners, switches, hubs and other devices. * Knowledge of remote support and desktop sharing technologies * Performed software patching and kept systems in compliance with applicable standards. Education MS in Management Information Systems Bowie State University - Bowie, MD 2015 BSc in Computer Science Ogun State University 2009 Skills Nessus, Nist, Microsoft access, Mysql, Visio, Risk management, Excel, Powerpoint, Word, Windows xp, Problem solving Additional Information TECHNICAL SKILLS * NIST SP NIST SP 800-18, 800-37, 800-53rev4, 53a rev4, 800-145, 800-146, 800-137, 800-30, 800-60, FIPS 199, NIST SP 800- 34, NIST 800-66 rev 1. * Risk Management Tools RiskVision (GRC

Agilience) * Vulnerability Tools Nessus Tenable * Operating Systems Windows XP, Windows7, Microsoft Server 2003, 2008R2. * Databases MySQL and Microsoft Access. * Microsoft Tools Word, Project, Excel, PowerPoint, Visio. INTERPERSONAL SKILLS * Good Verbal and written communication skills. * Effective problem solving skills with attention to details. * Ability to work independently or on a team on multiple tasks * Strong collaboration skills and result orientated.
