

Oracle Database Administrator Oracle Database Administrator Oracle Database Administrator  
Orem, UT Authorized to work in the US for any employer Work Experience Oracle Database  
Administrator MKIT Consulting LLC - Largo, MD 2014 to 2017 Administering a 800GB production  
environment with a two-node Real Application Cluster hosting Oracle 11Gr2 (11.2.0.3) on Red Hat  
Linux (RHEL 6) operating system with Tomcat/Weblogic servers as the application servers.  
Administering a 60GB development database environment on single instance servers hosting 11Gr2  
(11.2.0.3) database on Red Hat Linux (RHEL 6) operating systems. Administering a 120GB QA  
environment with single instance Oracle database servers on 11Gr2 (11.2.0.3) on Red Hat Linux  
(RHEL 6) operating system. Additional responsibilities: Creating, implementing and managing  
custom Oracle databases on Linux and windows platforms Worked in a database environment  
hosting tomcat/weblogic application servers Administered Oracle database support to various user  
groups; application developers, data managers etc; created and maintained Oracle database  
objects, schemas, tables, indexes etc Undertook capacity planning in terms of memory and disk  
usage, establishing benchmarks for business and technical performance Performed backup and  
recovery tasks on Oracle database using RMAN and cold back -ups using shell scripts Facilitated  
RMAN to restore and recover control and data files respectively Performed infrequent flashback  
and point in time recovery Created a database recovery catalog and registered databases to the  
recovery catalog database Used Crontab utility to schedule backups Supported system  
administration groups with maintaining oracle database servers and in pre-production, test, training,  
and development environments Respectively tuned database objects to run smoothly by analyzing  
query paths and using efficient indexing Used roles, and profiles to control and monitor user  
access to the database Constructed data migration using database link Used data pump export  
(expdp) and import (impdp) to migrate data Created listeners for databases. Registering  
databases and listeners to OEM Cloud Control 12C. Author scripts for automation to promote  
efficiency and productivity Experience using Oracle Enterprise Manager (OEM) to monitor,  
maintain and manage Oracle database. Support life cycle management with upgrade, refresher  
and migration Perform database, schema and table refresh from Production to Development

Applied Quarterly patches for RAC databases    Perform transparency data encryption    Performed SQL tuning with reports generated from SQL Trace, ASH, Explain Plan, AWR    Cloned production databases for testing and development    Perform database upgrade, patching and migration

Education Computer Information Systems DeVry University Certifications/Licenses Oracle Certified Associate Present
