

Web Developer Intern Web Developer Intern Web Developer Intern - NeoWare Studios Orlando, FL

I'm a Full Stack JavaScript Developer beginning a new career after my completion of the Treehouse Full Stack JavaScript Techdegree and Code Fellows coding boot camp. My journey started a few years ago when I realized that the craft brewing industry was no longer providing the technical and problem-solving challenges I desired. So I went back to my previous love for technology. I've completed a dozen projects, including a capstone project (a MERN Stack SPA) using MongoDB, Express, React, Node, HTML, CSS, Bootstrap and Google Maps API, & did 48 peer code reviews. I am excited to start my career by contributing to your development team. I'm eager to continue learning, open-minded, and passionate about technology. Authorized to work in the US for any employer

Work Experience Web Developer Intern NeoWare Studios - Orlando, FL May 2019 to Present neowarestudios.com Write code in HTML, CSS and JavaScript to create user-oriented visuals and features.
