

Sr. Python Developer - Data Engineering Sr. Python Developer - Data Engineering Sr. Python Developer - Data Engineering - Regions Bank Birmingham, AL Authorized to work in the US for any employer Work Experience Sr. Python Developer - Data Engineering Regions Bank - Birmingham, AL July 2015 to Present As per regulations related to AML every day data must be feed to the Office of Foreign Assets Control (OFAC) of the US Department of the Treasury administers feed record. In this project data from different line of business (Home Loans / Home Equity) must be extracted and sent it to the AML LOB in Regions Bank. Roles & Responsibilities: Developed Python based micro service to extract the data from system of records into Enterprise Data warehousing. Developed another micro service to extract AML data from Enterprise Data warehousing and push to external systems in JSON format. Wrote batch micro services in Python utilizing distributed message passing via Kafka message broker with JSON as data exchange formats. Deployed micro services in Mesos cluster in AWS using Jenkins, Marathon, and Chronos. Debugging the application and following messages in log files, to figure out the error if existing. Developed monitoring application which captures the error related data and store it in database Involved in storing binary data using CouchBase and CouchDB Server. Involved in tokenizing the sensitive data before archiving in AWSS3 using REST based Enterprise Tokenization service, and encrypting the data before sending it over wire to external systems. Assisted with development of web applications Flask, Pyramid, Django, and Plone. Developed Views and Templates with Python using Django's view controller and template language. Built an Interface between Django and Salesforce and Django with RESTAPI. Refactored existing batch jobs and migrated existing legacy extracts from Informatica to Python based micro services and deployed in AWS with minimal downtime. Involved in the setting up of Micro services in HA (Highly Availability) for resiliency. Used REST&SOAP to test web services. Developed Database Models in PostgreSQL. Developed Stored Procedures in PostgreSQL. Used GitHub for Python source code version control, Jenkins for automating the build Docker containers, and deploying in Mesos. Performed unit testing using unit test and Nose, etc. Python unit testing frameworks. Created applications for software package, software framework and hardware platform using SDK Involved in service

based RESTful technologies. Created a web service and provided its information to the service registry and made the information regarding the web service available to any potential requester using SOA. Assisted with development of internal APIs using PHP7, Laravel, and MySQL. Performed in page caching using Nginx, Varnish. Assisted with writing effective user stories and divide the stories into SCRUM tasks. Environment: Python, Boto3, Flask, Pyramid, Django, Plone, Docker, Mesos, SOA, REST, Chronos, Kafka, JSON, GitHub, Nginx, Varnish, LINUX Sr. Python Developer - Data Engineering Velocis Technologies - Plano, TX January 2013 to June 2015 The main concentration was to build products/services powered by the Internet. Daily businesses are sent as a batch file from the company to make the transactions. Free Bird processes these files and processes the transactions from respective channels such as ACH, EFT, and EDI payments.

Roles & Responsibilities: The system is a full micro services architecture written in Python utilizing distributed message passing via Kafka with JSON as data exchange formats. Created 6 micro services that has the capability to transfer the input files to machine readable format and pass through respective payment channels. Managed, developed, and designed a dashboard control panel for customers and Administrators using Django, HTML, CSS, JavaScript, Bootstrap, jQuery and RESTAPI calls. Worked on full-page caching by using Varnish and could handle massive traffic. Took advantage of Nginx in combination with Apache by using it as a reverse proxy. Supported development of Web portals, completed Database Modelling in PostgreSQL, front end support in HTML/CSS, jQuery. Debugging the application and following messages in log files, to figure out the error if existing. Designed and maintained databases using Python and developed Python based API (RESTful Web Service) using Flask, SQL Alchemy, and PostgreSQL. Involved in analyzing the problems using transaction breakdown, network monitoring and resource monitoring to find the performance bottleneck. Maintained and monitored frameworks like Django, flask. Developed monitoring application which captures the error related data and store it in database. Involved in scrubbing project, which updates the existing data with hashed values. Reverse engineer and re-implement legacy back-end software into Python with minimal downtime. Work closely with project leads to learn about the Azure services, environment deployment, and

integration with tooling. Used GitHub as a version control. Worked on UNIX environment.

Written complex SQL queries for data validation based on ETL mapping specifications. Optimized system performance and managed the API lifecycle. Performed unit testing. Extensively worked on writing UNIX shell scripts for scheduling the sessions for my testing process of ETL. Worked closely with leads in implementation exposure on service based, SOA, RESTful technologies.

Developed Micro-services using Drop wizard, Spring Boot, Lagom. Worked on Java Frameworks like spring, Hibernate. Environment: Python, Drop wizard, Spring Boot, Lagom, Kafka, JSON, GitHub, LINUX, Django, Flask, Varnish, Nginx SOA, RESTful Sr. Python Developer Wells Fargo - West Des Moines, IA November 2011 to December 2012 This project required data movement from the online systems to different downstream departments for decision and reporting purposes using PL/SQL, AutoSys, PERL and Data stage. Worked on various python Modules and packages, Using Django MVC framework to develop the Web Application, Database modeling and design. Roles & Responsibilities: Developed in Windows and going to deploy it in Linux server. Utilized Active Record eager loading to improve rendering time of index pages, incorporated up/down voting, reviewing, and several custom sorting methods for shows to provide smooth user experience. Supported the development of BI portal with development in SQL. Designed Satcom solutions for Vertical markets, conducted POCs for DSNGs with major media houses and channels.

Cross-referenced Seat Geek and Spotify APIs to get album artwork and track previews for each artist. Worked on Boston concert aggregator that provides a comprehensive list of shows in Boston with track previews, album artwork, tagging, up/down voting, and more to help users find the best show in town. Support customers with SDK-usage and design related queries, and create high quality collateral (samples, notebooks, etc.) Implementation exposure on service based, SOA, RESTful technologies. Worked on RSpec, Git, Object-oriented programming, MySQL, JavaScript, jQuery and, Amazon Web Services, Knockout. Environment: Oracle Database 11g/10g, TOAD, UNIX, PUTTY, PVCS, WinSCP, UNIX, PL/SQL, UNIX, Windows NT/XP, SOA Sr. Python Developer/Build Release Engineer/dev Ops CMC - Hyderabad, Telangana August 2010 to October 2011 Roles & Responsibilities: Created a portable fully automated test tool, allowing 24/7 integration support

for two development sites around the world and decreasing code turnaround time from 4 hours to 1 hour Automated the daily and weekly build process to allow us to build daily builds twice a day for faster turnaround time for submitted code changes Automated the code release process, bring the total time for code releases from 8 hours to 1 hour Developed a fully automated continuous integration system using Git, Gerrit, Jenkins, MySQL and custom tools developed in Python and Bash. Implemented a review process in integration automation using Review Board and Gerrit that eliminated the need for a 5 hour per week daily approval meeting Developed a web tool that monitors and drives the automated continuous integration system allowing release managers to track changes Played a key role in a department wide transition from Subversion to Git, which resulted in an increase in efficiency for the development community Developed a Coverity mail script that extracts code defects data per component for a daily report to drive reducing defects in the codebase. Created modern, REST APIs from existing information assets. Manage a technician that oversees automation and carries out daily tasks. Designed and maintained databases using Python and developed Python based API (RESTful Web Service) using Flask, SQL Alchemy, and PostgreSQL. Environment: Python, JSON, GitHub, LINUX Sr. Python Developer IDirect Technologies - IN December 2009 to June 2010 Roles & Responsibilities: Developed entire frontend and backend modules using Java and Python using Web Frameworks. Design, develop, test, deploy and maintain the website. Designed and developed data management system using MySQL. Rewrite existing Python/Django modules to deliver certain format of data. Used Django Database API's to access database objects. Wrote python scripts to parse XML documents and load the data in database. Generated property list for every application dynamically using python. Handled all the client side validation using JavaScript. Used Eclipse as IDE tool for creating JSPs, Servlets, EJBs, and XML. Creating unit test/regression test framework for working/new code. Build SQL queries implementing functions, packages, views, triggers, and tables. Using Subversion version control tool to coordinate team-development. Responsible for debugging and troubleshooting the web application. Handling the day-to-day issues and fine-tuning the applications for enhanced performance. Worked in development of applications especially in UNIX

environment and familiar with all its commands. Environment: Java, Python, Struts 1.2, Django 1.0, MySQL, Linux, HTML, XHTML, CSS, AJAX, JavaScript, SQL, MySQL, Apache Web Server, UNIX

Education Bachelor's Degree in Information Technology in Information Technology JNT University

Skills LINUX (7 years), MySQL (5 years), Python (7 years), SQL (5 years), version control (5 years)

Links <http://www.montage.global> Additional Information IT Professional with 8+ years of experience in Web/Application Development in analytical programming using Python with strong skills in analysis, design, development, testing and deploying software applications Good experience in using various Python libraries to speed up development (libraries used: Beautiful Soup, SciPy, Matplotlib, Python-Twitter, Pandas Data Frame, Network, Urllib2, MySQL DB for database connectivity and JSON libraries). Strong hands-on experience on Plone, Pyramid, Django, Angular PostgreSQL, ZODB, Key Value Stores, CouchDB, CouchBase, Linux, Nginx, Varnish, ReactJS and Odoo. Good knowledge on frameworks such as Bootstrap and Foundation. Excellent experience on various Python integrated IDE's such as Sublime Text, Pycharm, Eclipse and NetBeans. Experience in working on various python packages such as NumPy, SQL Alchemy, Pyside, SciPy, and PyTables. Expertise in usage of Django Framework for developing web applications. Good knowledge in establishing database connections for Python by configuring packages MySQL-Python. Experience in developing web applications by following Model View Control (MVC) Architecture using server side application Django. Strong experience in Data Analysis, Data Migration, Data Cleansing, Transformation, Integration, Data Import, and Data export using multiple ETL tools such as Ab Initio and Informatica Power Center. Develop Extract-Transform-Load (ETL) packages using SSIS to insert datasets to SQL server and generate project reports using SSRS and SQL. Experience in Installing, upgrading, and configuring RedHat Linux4.x, 5.x, 6.x and 7.x using Kickstart Servers. Experience in implementing Puppet, Chef. Worked on Data-Center operation and migration across UNIX and Linux platforms. Experience in Creation and managing user accounts, security, rights, disk space and process monitoring in Solaris and Red hat Linux. Experience in implementing and maintaining an Apache Tomcat /MySQL/PHP, LDAP, LAMP web service environment. Experience in migrate an On-premises VM or Azure Classic VM to Azure

ARM Subscription with Azure Site Recovery. Hands on experience in configuring and supporting site-to-site and remote access Cisco, IPSec, VPN solutions using ASA/PIX firewalls, Cisco, and VPN client. Experience in Multi-Tier distributed Enterprise applications. Extensive experience in system analysis, design, development, and implementation of web based and client/server application using HTML, Angular JS, underscore JS, Node JS, CSS, JavaScript, AJAX, JSP, JDBC, XML, XSLT, Python, Django, PHP. Working knowledge in multi-tiered distributed environment, OOAD concepts, good understanding of Software Development Lifecycle (SDLC). Experience in Implementation of MVC/ MVW architecture using Servlet, Django, and RESTful, SOAP web service and SOAPUI. Experience in installing, configuring, modifying, testing, and deploying applications with Apache, Tomcat, and WebSphere. Excellent experience of Databases such as MySQL, Oracle 8g/9g/10g, Microsoft SQL Server, PostgreSQL, SQL/PLSQL concepts. Good knowledge in using IDE Tools like Eclipse, NetBeans, Android Studio, Visual Studio, IDLE. Strong experience on Ruby Reg-Ex for pattern and Text matching. Experience with continuous integration and automation using JENKINS. Experience with Unit testing/ Test driven Development (TDD), Load Testing in JIRA and JENKIN. Operating Systems: UNIX, Linux, Windows, and Mac Programming Languages: Python and PL/SQL Databases: Oracle 10/11g, MySQL, SQL Server, and PostgreSQL Tools: IntelliJ, PyCharm, FileZilla, PL/SQL Developer, and TOAD Integration Tools: Jenkins and Web Builder Version Control: GitHub and SVN Defect Tracking: JIRA, Git, and Version One Cloud: VPC creation, EC2 instance, S3 buckets, RDS instances, Amazon command line, CloudFront, IAM, creating security groups, managing S3 object lifecycle, creating CDN, implementing S3 security & Encryption, Route53, working with databases and DNS, Using bootstrap scripts, AWS EC2 and S3
