

Job Seeker After 17 years with Xerox's printer division, Dan developed his IT analyst, Network Administrator and Help Desk skills while working for several, large, corporate IT departments. At WestEd - a technically savvy, nonprofit educational research, development, and service agency - he became the Lead Engineer on all IT systems for 17 years. Subsequently, at Syar Industries, he developed, procured and built and deployed VMware, Nutanix, Horizon View and multiple other technologies. Dan has focused on physical and virtual network server environments, implementing Windows Server, VMware and related tool sets. Constantly learning new technologies. Developing new skill sets to improve value and ability to integrate all technologies
