

Lead Visual Designer and Front- End Developer Lead Visual Designer and Front-End Developer  
Senior Visual Designer / Front- End Developer Silicon Valley, CA Working collaboratively with back-  
end programmers, I design and develop user interfaces, rapid prototype layouts, while always  
keeping my clientele's preference in mind. My extensive knowledge and strong foundation in graphic  
design, typography, and page layout allows me to build web experiences effectively and efficiently in  
a time sensitive environment. I've been designing and developing for the past 10 years. Work  
Experience Lead Visual Designer and Front- End Developer VECTOR LAUNCH, INC January 2019  
to August 2019 Created new style guides and maintained current brand guidelines for this start-up  
rocket launch company. Worked closely with the director of marketing and CMO to develop and  
design ad campaigns, social media assets, user guides, data sheets and additions to the company  
website. Led the design efforts on a government proposal for the United States Air Force. Vector  
was awarded the \$3.4 million bid to provide rocket launch services. Developed the visual design  
system for GalacticSky, the company's software defined satellite platform. Collaborated with  
software developers and managers to design and develop the second generation customer-facing  
website to further push marketing efforts. UX Designer / Front- End Developer Contractor SVE, LLC  
January 2011 to October 2018 Working on web and desktop-based applications for US Sports  
Timing, including RM Timing Systems ([www.rmtimingsystems.com](http://www.rmtimingsystems.com)), MyRegNow  
([www.myregnow.com](http://www.myregnow.com)) and RM Races Live ([www.rmrmraces.live](http://www.rmrmraces.live)). Handled the design and front- end  
development of a race results platform, registration platform and desktop based application for race  
event timing. The web applications were built on ASP.NET MVC Razor, Knockout JS, jQuery and  
the Twitter Bootstrap framework. The services are used widely throughout the US and has been  
currently adopted to other countries around the world. Also worked on over 20 race event  
micro-sites running on content management systems with custom-built themes. Collaborated with  
over a dozen race organizers to design event themed web sites Web-based applications  
developed to be fully responsive in layout and contain an extensive enterprise-level administration  
section Event results pages have received over 50,000 unique page hits each day Worked  
closely with back- end programmers to improve page speed load Art Director & Web Interface
