

Junior Software Developer Junior Software Developer Junior Software Developer Marriottsville, MD

Through my ongoing education at Towson University, where I study Software Engineering, and my current job as a Software Developer, I have become well versed in JavaScript, Java, HTML5, CSS, and SQL. Though I may not be an expert at any of these languages, my passion for learning and growth are what motivate me daily. In a few years time, I see myself possessing enough technical knowledge to be capable of helping others grow professionally the same way I have. On top of my technical knowledge I am skilled in management, finance, and accounting, earning my spot on the Dean's List at Salisbury University on multiple occasions. In my experience, anything worth achieving will always have obstacles in the way. I have the drive and determination to overcome those obstacles for whatever it may be. Success drives who I am today and what I aspire to be down the road

Authorized to work in the US for any employer
