

Analyst, IT Security Infrastructure Services Analyst, IT Security Infrastructure Services Analyst, IT Security Infrastructure Services - CAPGEMINI CORPORATION Austin, TX Work Experience Analyst, IT Security Infrastructure Services CAPGEMINI CORPORATION - Austin, TX April 2014 to Present

Security Incident Handling - Collaborate with the head of Major Security Incident Management, Chief Information Security Officers, and subject matter experts to detect, analyze, contain, eradicate, and recover from malicious attacks against our network of over 9,000 servers resulting in complete recovery of the enterprise network. Perform security assessments (audits) for physical and logical security processes and procedures and deliver results to upper level management, TxDIR, and 32 state of Texas affiliated agencies. Used 27001, HIPAA, and NIST 800-53 and best practice control frameworks. This resulted in a savings of hundreds of thousands in penalties. Serve as head administrator of our physical access application, tracking training achievements, background clearances, and performing logical on-boarding and off-boarding of 5 to 25 people weekly. Assisted in orchestrating and lead the Bash Shell Shock patching initiative for over 1600 affected Linux, Unix, and Novell servers affecting TxDIR and 32 state agencies. This resulted in improved integrity of all vulnerable servers. Write Technical and Functional Specifications for upgrades to our physical access tracking application. Ensure that all security training is properly administrated and properly followed by all trainees. Orchestrated and lead the initiative to clean up over 400 non-compliant service accounts for all service providers and state agencies as a result of a 2-year gap in processes. This greatly reduced the risk of system account misuse. Create and revise 15 enterprise best practice framework documents annually for the State of Texas Department of Information Resources (TxDIR), 32 state agencies, and Xerox which results in establishing policy for all contract employees. Present new processes and procedures to TxDIR and state agency Chief Information Security Officers and other executive officers from Xerox and Capgemini (Service Providers), TxDIR, and state agencies on a weekly and monthly basis. Generate and prepare 2 weekly reports and 4 monthly reports to be posted to our SharePoint site for TxDIR, state agency, and partner review.

Consultant, Production Revenue Accounting CAPGEMINI CONSULTING - Dallas, TX March 2013 to January 2014 Consultant, Production

Revenue Accounting module of the SAP IS-OIL Upstream Solution & ABAP Graduate of Strategic System & Products Corporation's Consultant Professional Development Program SAMSON RESOURCES Provided on-site support for Samson Resources' SAP Production Revenue Accounting (PRA) configuration by testing Colorado state severance & withholding tax functionality Collaborated with Senior Management to translate client requests to completed data mappings. Used these data mappings to devise potential program logic and pseudo-code. Finally, used collected information to create data conversion programs. Programs created: Joint Audit Data Exchange (JADE Audit) report program, JP Morgan specific ACH reporting programs, well volume and business associate batch data conversion programs. Created custom queries and SAP List Viewer (ALV) interfaces for division order, production volume, and taxation reports. Made changes to existing programs such as the production revenue contract maintenance batch data loader. Supported the implementation team in the testing of all SAP PRA process areas. Tasked specifically with testing payment processing and combined run report functionality to insure end-user requirements and to validate SAP service packages. QEP RESOURCES INC. Assisted the implementation team in finalizing all end-user documentation for SAP FI/CO business process areas, in order for documentation to be signed off by the project manager and technical lead.
