

Oracle Database Administrator Oracle Database Administrator Oracle Database Administrator Work Experience Oracle Database Administrator Big Data Clinical Research - Hyattsville, MD January 2017 to April 2019 Planned, installed & configured Oracle 11g and 12c databases on Linux and Windows Troubleshoot and resolved various complex issues within the database; for example; corrupted datafiles, redo log files, TNS and listener connection issues, control file and spfile problems Monitored and administered database security by adding and removing users, administering quotas, and performing standard and fine grain auditing of the database Monitored user sessions and took appropriate action to kill inactive sessions Provided technical support to application development teams Provided technical expertise, knowledge and leadership in the design, implementation and maintenance of Oracle 11g and 12c databases Provided database administration on production, testing and development database servers Applied quarterly CPU patches to different version of databases to fix vulnerabilities Upgraded Oracle 11g databases to 12c on same and different server Designed and implemented Oracle backup strategy for multiple databases Implemented the use of Oracle Recovery Manager and Oracle Recovery Catalog for backup Identify and recover the corrupted db blocks using Block recover option in RMAN utility Performed complete media recovery of database depending on the nature of failure Administered database recovery operations to current, point in time and to alternate location Performed database cloning and duplication using RMAN utility Extensively used DATAPUMP and Export /Import utilities for logical backups Performed series of database refreshes from production to test Performed bulk load into the database using SQL Loader Moved data from one database to the other using Transportable tablespace Used explain plan, AWR, ADDM and various Oracle Advisors to tune the database Tuned various slow running queries using AWR, ADDM and various Oracle Advisors Analyzed Tables and Indexes for performance base Created and rebuild indexes as necessary Created, managed and optimized Oracle materialized views Managed Undo Tablespaces, Schema Objects, Redo Logs, Control files and Archive logs Implemented multiplexing Control Files and Redo Log Files Scheduled jobs using various Oracle tools such as Oracle OEM, DBMS JOBS, SCHEDULER Installed, configured and managed Oracle 12c (RAC)

database on ASM storage    Managed RAC databases using CRSCTL, SRVCTL tools    Applied CPU critical patch on RAC database in rolling manner    Configured and setup Oracle 12c Data Guard    Managed Oracle Standby Database and Data Guard using Data Guard broker    Troubleshoot and resolved log gap in Data Guard Configuration    Documented database structure, changes, problems, issues for future reference Oracle Database Administrator Neway IT Solutions - Hyattsville, MD August 2014 to December 2016    Provided technical expertise, knowledge and leadership in the design, implementation and maintenance of Oracle 11g and 12c databases    Designed, documented, and deployed database architectures and applications    Expertise in the creation of databases, tablespaces, tables, indexes and other database objects    Upgraded Oracle 10g databases to 11g    Upgraded Oracle 11g databases from 11.2.0.1 to 11.2.0.3 using patch set    Implemented Data Pump Export /Import utilities for logical backups    Migrated data between databases using Oracle 10g and 11g EXP/IMP and Oracle 11g Data Pump    Utilized RMAN utility for performing various types of physical backups and database duplication    Configured various RMAN parameters as per the requirement    Created Recovery Catalog for external backup    Imported bulk load data into the database using SQL Loader    Performed database refreshes, cloning and duplication from one Oracle database to the other    Provided network troubleshooting and administrative support for the development staff    Configured Oracle network components to ensure database access, consistency and integrity    Troubleshoot and resolved various Oracle problems such as connectivity and performance issues    Created and managed documentation on the configuration and support of the Oracle databases    Performed Standard and Fine Grain database auditing    Administered database user accounts    Created, modified and deactivated user accounts    Assigned and monitored database user privileges and roles    Assigned and monitored user access rights    Monitoring the user sessions and take appropriate action to kill the inactive sessions    Performed instance tuning, memory tuning query tuning and complete database tuning    Generated AWR & ADDM reports manually    Monitored Alert Log Files and Trace files on day to day basis    Documented Database structure, changes, problems, issues for future reference    Created and managed Tablespaces and Datafiles    Created and tuned various materialized views

Installed Oracle Databases using DBCA   Installed and manage Oracle Enterprise Manager (OEM)  
Education Boltos Solutions Institute - Laurel, MD Bachelor of Science in Exercise Science in  
Exercise Science Towson University - Towson, MD Skills Data migration, Oracle, Pl/sql, Sql, Rman,  
Linux, Unix, Loader, Oem, Performance tuning Additional Information   Proficient in Oracle 11g and  
12c Database Administration   Proficient in Database Migration, Upgrade and Patch Application  
Proficient in RMAN, Backup and Recovery   Proficient in Performance Tuning   Oracle Enterprise  
Manager   Real Application Clusters (RAC)   Data Guard Administration   Strong leadership skills  
Strong verbal & written communication skills   Great problem-solving skills, responsible and reliable  
team player with an established reputation for effectively working with diverse groups of people and  
changing environments   TECHNICAL PROFILE   Relational Databases: Oracle 11g, 12c  
Operating Systems: Unix(Linux), Windows   Programming Languages: SQL, PL/SQL, SQL\*PLUS,  
Shell   Software Applications/Tools and Utilities: OEM, RMAN, AWR, ADDM, DBCA, DBUA,  
NETMGR, NETCA, LSNRCTL, DATA   MIGRATION-EXPORT-IMPORT,   PROCEDURES,  
PACKAGES & FUNCTIONS, BACKUP & RECOVERY, PERFORMANCE TUNING, SQL LOADER,  
REAL APPLICATION CLUSTERS (RAC), DATA GUARD
