

Apollo Developer Apollo Developer Front End Developer Seattle, WA When I was a much younger man, I realized I enjoyed building things when my LEGO collection outgrew all the shelf space in my room. From there, I moved from taking apart small electronics. I eventually realized programs, like LEGOS, are built together piece by piece! In addition to my passion for technology, I enjoy running, and entertaining my Australian Cattle Dog. Work Experience Apollo Developer IQVIA - Seattle, WA July 2018 to Present JavaScript, jQuery, and React.js Create, edit, and maintain clean JavaScript code. Build React components and prototypes based on UI specs. Import custom React library into Framer X Front End Developer Opus Agency - Beaverton, OR August 2017 to July 2018 Responsible for producing event registration / management websites and reporting to support events. These are created using HTML, CSS, JavaScript, SQL, and a proprietary content management system.
