

User Experience Engineering Associate Manager User Experience Engineering Associate Manager
Software Engineer Austin, TX I am a software developer with several years of coding experience.
My journey started 6 years ago with Java and C++. Since then I have worked with multiple
technologies for web and desktop software development. Currently I work with a rapidly evolving
world of JavaScript based technologies and frameworks. I think my main strength is the ability to
quickly identify and pick up new technologies for new and ongoing projects. When it comes to
working in a team I value soft skills as much as hard skills. I am easy to work with, have great
relationships with previous employers and always eager to learn more and improve myself as a
developer?. For more information and portfolio check my website: <http://dbudak.com/> Authorized
to work in the US for any employer Work Experience User Experience Engineering Associate
Manager Accenture - Austin, TX June 2019 to Present ? Received 2 Automate Innovate
Differentiate awards for introducing new practices and technologies that helped to streamline the
