

Software Engineer Software Engineer Software Development Engineer Seattle, WA Application developer with 7+ years of software and web development experience. My passion lies in ASP.NET application development, Android application development and automation scripting. Work Experience Software Engineer Providence Healthcare Network - Renton, WA April 2019 to Present Constructed aspects of the user interface for the Providence Health risk arrangement database: designing views, coding user interface and backend ASP.NET MVC services. SCRUM meeting scheduled daily with team on two-week sprints with assigned story points. Coded Model, View, Controller and backend service files for an ASP.NET MVC source application on dedicated GIT project branch. Utilized Kendo UI as a front- end framework for design and consistency of application widgets. Software Development Engineer / Project Manager Randstad Technologies Vendor - Redmond, WA November 2017 to December 2018 Optimized 1CS (Compliance Extension for Azure DevOps) installation time and mitigated manual configuration workflow when onboarding to new Azure DevOps instances through the use of PowerShell scripts. Onboarded 1CS extension onto new Azure DevOps accounts through PowerShell scripting. Composed User Guide and Self-Service Authoring documentation on Microsoft's Compliance Tooling website. Assembled PM specifications to reduce the need for external support during 1CS (Azure DevOps Compliance Tool) extension onboarding. Front- End Application Developer AT&T - Bothell, WA January 2016 to October 2017 Implemented new UI requirements, functionality, reporting and chat information for projects involving AT&T's acquisition of DIRECTV. Merged several projects to their corresponding release branch while keeping them updated with trunk during development phase. Gave analysis and committed code for approximately 1,500 front- end user impacting defects on att.com's consumer buyflow. Education Bachelor of Science in Informatics University of Washington June 2010 Skills Javascript, Android, Git, HTML 5, JQuery, Asp.Net, C#, Entity Framework, Agile, React Links <http://www.linkedin.com/in/chrisclaiborne> <http://www.github.com/cclaiborne> Certifications/Licenses Certificate in Android Application Development June 2016 to Present University of Washington Software Development and Testing: Ruby on Rails March 2014 to Present Code Fellows
