

Front- end Developer Front-end Developer Front- end Developer - Best High Technologies, LLC
Jersey City, NJ Work Experience Front- end Developer Best High Technologies, LLC February 2016
to Present Description: The client is MakerBot which is a global leader in the 3D printing industry.
Our team is responsible for developing a HR Management System for their new employees' training
service. This system includes several modules, like Timesheet Management, Applicant tracking and
onboarding, Employee self-service and Scheduling system. My main duty is to design the all the
front- end features and cooperate with back- end developers. Responsible for developing websites
by HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX, Reactjs. Extensively used jQuery UI,
Bootstrap and Font Awesome for styling the HTML elements and developed a responsive webapp.

Built the Simple Page Application by React framework and Redux Architecture. Navigating the
pages by React-router. Applied several the middleware in Redux, such as redux-thunk,
redux-promise and redux-logger. Created and designed reducers and action dispatchers to maintain
common updated state around all the container components using Redux. Used Webpack to
bundle modules and deal with the pre-processing files like LESS via loaders. Used Fetch API to
write various Ajax requests and resolved JSON for different modules. Efficiently used functional
libraries like Lodash to manipulate complex collections involved within business logic. Mocked the
dynamic data by Expressjs of Node.js. Evaluated the performance by React-Addons module and
avoided the unnecessary render by PureRenderMixin. Implemented version control through Git.

Front- end Developer Bond Network Company, LLC June 2013 to May 2014 Description: Involved
in developing the second phase of the logistics information management system which focused on
managing the information and generating several enterprise reports including contract, detail freight
list, packing list, shipping order, invoice etc. in export trade. My duty is get the data from the server
side and visualize these data. Responsible for developing Front- end web applications using
HTML, CSS, JSP, JavaScript, JQuery, EasyUI, AJAX. Used jQuery Datatable framework to
build-up most of the tables and grid lists and use its Datatable Editor to create, edit and remove
each customer list. Used jQuery plugins for autocomplete, validation, drag and drop and also used
jQuery template for markup. Designed PDF, excel and print previews for all the reports in the

application using HTML, JavaScript. Hands on JSON for data transform and page transform.
