

Front- end Developer, Horizontal Integration Front-end Developer, Horizontal Integration Front- end Developer, Horizontal Integration Minneapolis, MN Authorized to work in the US for any employer Work Experience Front- end Developer, Horizontal Integration Digital Agency - Minneapolis, MN May 2017 to Present Take full Photoshop or Sketch files produced by our in-house UI/UX team or a client's team and create a full front- end experience. This includes a full Gulp workflow with the creation of reusable web components for each project. I've also been tasked with creating and introducing an automated digital design style guide that we can use on future projects. This allows clients to easily traverse through the front- end components that were built in a simple, intuitive interface. Front- end Developer / Designer / Producer 906 Technologies - Marquette, MI December 2006 to May 2017 Complete tasks in all areas of the development cycle for the growing company. This includes initiating contact with clients, gathering project requirements, designing mockups in Photoshop/ Sketch, cutting up the approved assets, coding into HTML/CSS, and finally testing and pushing the products to a production environment. Lead company in discovering and strategically utilizing the newest technologies for front- end design and development. Initiate new leads and draft estimates / project statements for new business ventures. Develop HTML5, CSS3, SASS, LESS, PHP, MySQL, JavaScript/jQuery, Angular, Grunt/Gulp, Node.js Design Photoshop, Illustrator, Sketch, Invision App, Principle Software WordPress, Craft CMS, Magento 1 & 2, BigCommerce, Shopify, Drupal, Git, Jira Framework Bootstrap, Foundation, Susy, Bourbon/Neat, Ionic Human Leadership, Communication, Self-motivation, Critical Thinking, Organization, Curious
